

National Geospatial-Intelligence Alumni Association – East Chapter

APRIL 2020
#116

From the NGAA-East Chapter President:

NGAA-East (formerly the National Geospatial/Intelligence Alumni Association-NGIAA and the Defense Mapping and Charting Alumni Association-DMCA founded in 1980) provides a way for current and retired DMA/NIMA/NGA employees to keep in contact and exchange information, ideas, and experiences. Currently, NGAA-East has over 544 active associates and members.

NGAA-East OFFICERS (2020-2021)

PRESIDENT – Barry Tilton (703) 298-3371 e-mail: barrytilton@gmail.com

PRESIDENT-ELECT – Irv Buck (703) 591-2593 e-mail: justducky501@hotmail.com

VICE-PRESIDENT – Kim Robson (571) 422-2423(c) e-mail: Kim.A.Robson00@gmail.com

TREASURER – Dennis Drum (703) 742-5437/ (571) 641-9102(c) email: caverat44@gmail.com

EDITOR/SECRETARY – James Johnson (571)216-4702 e-mail: Johnsonreston@aol.com

Past-President/Representative to NGAA Board of Directors - Joe Steel (703)404-6996/ (703)483-1251 e-mail: jwsteel3@aol.com

Representative-at-large to NGAA Board of Directors – Joseph Spytek (703)820-3856 Cell: (571) 275-2124, e-mail: spytek@comcast.net

Liaison to foreign GEOINT Professionals – Jack Hild (410) 461-4537/(720) 378-1053 (c) e-mail: jndhild@aol.com

SENIOR ADVISOR - Allen E. Anderson (703) 842-3188 e-mail: excelsior1928@gmail.com

HISTORIAN - Dorothy Jennings-Smith (239) 454-6109 email: DOTJENN@aol.com

STAFF DIRECTOR.WEBMASTER - Angelo Meoli (410) 465-3496; (301) 661-9378(c) e-mail: ngaaeastexec@aol.com

NGAA – East Website: www.ngaaeast.org

We use the Internet to communicate timely information to you. Please submit any address, phone, and email changes to:

Ange Meoli

11584 Scaggsville Road, #315 Fulton, MD 20759
301-661-9378 (C) e-mail: ngaaeastexec@aol.com

We also welcome any new articles or items of interest you would like to share with NGAA-East. Please submit to Ange Meoli at the email above.above.

Before I begin my welcome (which I had written originally in early March for this issue...) let me extend (both personally and on behalf of the entire Association) our thoughts go out to all impacted by the COVID-19 situation. As is true of most other organizations, the activities we normally plan for Spring are in limbo at the moment. Please do look for updates from Ange or me concerning the re-set for individual events. We will get back to “normal” as soon as the circumstances dictate. Now – onto my planned message...

For those of you I haven't met (there are still many...) permit me to introduce myself. I am Barry Tilton, the 2020-21 President of our Chapter. The East Chapter has been very active, and continues to support well, the dual functions of providing a professional communications conduit to those of us who supported NGA and its many (and diverse) predecessors, as well as providing a social outlet for our engagement. I would like to thank Joe Steel for his two years of wise leadership of our area, and wish him all of the best as he assumes the greater role as head of the NGAA Board of Directors (parent organization to the NGAA-East and -West). This organization would not function without the consistent support of our Staff Director, Ange Meoli and the members of the Executive Board. I also would like to acknowledge the special contributions of Jack Hild over the last two years as he has brought an opportunity to include the broader international GEOINT community into our association with the addition of the newly approved NGAA-E International. We will be welcoming members of the ASG and GEOINTers from many parts of Europe into the fold. This is exciting, as much of our tradecraft evolved through international cooperation from the outset.

Finally, I encourage those of you who are members to attend some of our many gatherings throughout the year once we get back to having them. Besides our two formal meetings in Spring and Fall, we have planned tours of key historical facilities, wineries and other locations to educate and entertain. I wish all of you the best getting through the rest of the 2020 pause and on into the new decade.

Sincerely

Barry C Tilton 2020-21 NGAA-East President

CHAPTER NEWS

Coronavirus: COVID-19 the newest strain of Coronavirus

The only thing on most of our minds is the threat of a new virus, COVID-19 (SARS-Co2, the novel coronavirus that causes coronavirus disease 2019) (1). You're probably wondering who is at risk or if you'll contract the virus. The entire world has been affected by COVID-19, from China to Africa, Europe to the Americas are reeling from the numbers of confirmed cases of COVID-19 (2). Researchers discovered four types of coronavirus in the 1960s, with four sub-groups alpha, beta, gamma, and delta. Two forms of coronavirus recently of concern are the MERS-CoV (Middle Eastern Respiratory Syndrome), and SARS-CoV (Severe Acute Respiratory Syndrome), both of which are beta-coronaviruses (1).

The question on the tip of everyone's tongue is, "what can I take to make sure that I don't get this virus?" Although researchers are working diligently to develop a vaccine to help improve immunity to this specific virus, there is no cure.

The truth about viruses:

Viruses need a living host to reproduce. You see, viruses' ^[1]lack mitochondria (organelles necessary for cellular respiration) and energy production in the cell. These microbes cannot produce ATP (adenosine triphosphate); this is the preferred energy source needed for the majority of cells in the body. Viruses use the DNA of the host to replicate themselves by injecting their DNA or RNA that is then replicated by the host cell (3). Once infected with a virus, it's hard for the body's defenses to fight. So, you don't die from contracting the virus, the common denominator with many viruses is they cause other infections such as pneumonia and other acute respiratory infections.

A few things we can do to reduce our chances of contracting the COVID-19 virus:

According to the CDC (Centers for Disease Control and Prevention), simple hand washing with soap and warm water for at least 20 seconds (4) (try singing the "Happy Birthday" song twice, that will take you about 20 seconds). Avoid rubbing your face and eyes with unwashed hands (4). If you are not able to wash your hands with soap, use a hand sanitizer with at least 60% alcohol (4). Limit your exposure to large crowds, and stay

about 6 feet away from others, especially if they are coughing or sneezing (4). These simple steps seem like common sense because they are!

A few things you can do to boost your immune system:

In addition to social distancing, hand washing, and touching your face and eyes, there are a few other things that you can do to improve your immune system. Eat a whole foods diet, making sure to consume a variety of fresh fruits and vegetables. Limit your prepackaged food and fast food intake. We are all so busy, never having time to make meals. Now that many people are quarantined to our homes, this means there is time to prepare healthful meals.

Dietary strategies:

Try new recipes to incorporate fruits, vegetables, such as artichokes. The outer leaves may be tough and sharp, but the inner heart of this thistle is tender and delicious. Artichokes are rich in inulin an oligosaccharide (sugar molecule) that is the preferred energy source for the cells of the large intestine. The large intestine houses our microbiome, which consists of good bacterial, as well as pathogenic species that can cause diseases when they are out of balance. By supporting your overall microbiome, you can reduce the chances of bacterial overgrowth in the gut. By improving your overall health, you can improve your immune system. Reducing conditions such as obesity (weight gain in the mid-section of the body), type II diabetes, high LDL cholesterol/low HDL cholesterol, and high triglycerides. Reducing undue stress will aid in improving your immune system: stress and anxiety cause oxidative stress on the cellular level lowering the body's ability to fight off an infection that can cause inflammation (5).

During this time, make sure to pay attention to social distancing, practice self-care by going for a walk, riding your bike, or participate in a guided yoga class or meditation session on your smart-phone, tablet or computer. Try a new recipe that incorporates plenty of fresh fruits and vegetables. Finally, wash your hands regularly with warm water and soap.

Stay healthy and be well.

Overview of the Bethesda Government Site Then and Now

If you are in the area of the old NGA headquarters you might drive by to see the transformation. As part of the 2005 Base Realignment and Closure Act, the National Geospatial-Intelligence Agency (NGA) vacated their current facility at 4600 Sangamore Road in Bethesda, Maryland and relocated to Ft. Belvoir, Virginia.

ORIGINAL ERSKSINE HALL IN THE 1950'S

THEN THE NATIONAL GEOSPATIAL- INTELLIGENCE AGENCY Circa 1990

FINALLY THE INTELLIGENCE COMMUNITY CAMPUS -- BETHESDA - 2015

Intelligence community unveils state-of-the-art campus in 2015

"World-class facility...is physical manifestation of 'intelligence integration'"

James R. Clapper, former Director of National Intelligence (DNI), participated in a ribbon-cutting ceremony to celebrate the opening of the Intelligence Community Campus-Bethesda.

The purpose of the state-of-the-art facility, which is located at 4600 Sangamore Road in Bethesda, Maryland, is to develop a collaborative IC campus for the relocation of up to 3,000 intelligence professionals in the Washington National Capital area.

The ICC-B features a new six-story parking garage, as well as a sleek glass façade that wraps around the three pre-existing buildings to create a unified modern structure that centralizes and efficiently distributes mission services. |

The campus, which is conveniently located in the heart of the intelligence community, will host employees from ODNI's National Counterintelligence and Security Center, the National Intelligence University, and DIA.

"If you look at a map, the Bethesda location is almost exactly in the middle of all of the intelligence agencies," said Jim Manzelmann, ODNI's new assistant deputy director for facilities. "That was one of the big selling points when decisions were being made to move forward with this program."

From the shapes of the buildings and exterior paneling to the earth tone pigmented walkways, the entire campus is being constructed to minimize any impact on the environment. Roberdeau Hall will feature LED, or light-emitting diode, lighting technology that uses only 10 percent of the energy used by standard office lighting, as well as daylight sensors to reduce electricity use. The building will consume 69 percent less energy than it did before renovation and can also be zero-net energy, meaning it could produce as much energy as it consumes during a year. Running off photovoltaic solar panels, the garage, Vehicle Control Center and Vehicle Inspection Station at ICC-B already operate as zero-net energy buildings. The VCC uses groundwater heat pumps, temperature control and energy-efficient glass. The facility's garage is net-positive, meaning it generates more power than it needs. Overall, the entire campus is expected to use 31 percent less energy than before renovation.

By using what was already in place, the intelligence community was able to get a state-of-the-art facility for roughly 60 percent of the cost, according to Manzelmann, who oversaw this project during his recent tenure as DIA's director for mission services. "Finding a way to take a campus where some of the buildings were 70 years old and converting it into a brand-new facility makes this extremely special," he said. "Rather than throwing everything away, this location has been given a rebirth – a new beginning."

Further details on the renovation of the Bethesda site are shown in the [FacadesRenderingsFINAL.pdf](#), and the [SitePlanProgression.pdf](#), plus the final results such as the graphic below: Are located in the website file:

Five foods that improve brain health For Seniors

Base on the fact that we are all aging, here are some suggestion about foods that may, and I do mean may, help with your brain health.

1. Eggs - Rich in choline a vitamin like substance that assist in neurotransmitter synthesis and the metabolism of proteins and fatty acids. Choline aids in the reduction of cardiovascular disease, non-alcoholic fatty liver disease, and cognitive decline due to aging and traumatic brain injuries.

2. Avocados – Great source of mono-unsaturated fatty acids that aid in reducing inflammation in the brain, and lower risk of cardiovascular disease. They are particularly high in omega-9 (oleic acid) that reduce insulin resistance. They are high in soluble fiber; contain more potassium than a single banana. Avocados contain other nutrients such as vitamin B6, B5, C, E, K and folate.

3. Deep water fatty fish - Such as salmon and Pacific mackerel/chubb are wonderful sources of omega 3 fatty acids. These saturated fatty acids reduce inflammation that can cause brain fog and symptoms of depression. Note that Pacific mackerel have been found to have lower levels of mercury than tuna and salmon.

4. Berries - Such as blueberries, raspberries, and blackberries are great sources of antioxidants such as vitamin C, and gallic acid, which reduce the effects of free radicals in the body. Berries have phytochemicals that lend their brilliant rich color known as anthocyanins that aid in memory functions and improve urinary tract health.

5. Walnuts - A true brain food, they are a plant source of DHA (docosahexaenoic acid), an omega 3 fatty acid that aids in improve brain health, reduce cardiovascular disease, and improve mood which reduces symptoms of depression. These nuts are high in protein, soluble and insoluble fiber, and have been found to aid in reducing the chance of developing type II diabetes.

VOLUNTEER OPPORTUNITY AT SPY MUSEUM

Once the nation is back to work and the current health crises has been contained you might consider this volunteer opportunity. Calling all SPY fans and intelligence experts! The International Spy Museum in Washington, DC is now recruiting volunteers to join their team. The International Spy Museum Volunteer Program advances the mission of the Museum by providing dependable service and being an approachable resource for guests, staff and the diverse Washington, DC community. Enjoy meeting new people? Love espionage? You may be a perfect fit for our program. Learn more about volunteering and apply online at <https://www.spymuseum.org/support-spy/volunteer-program/>.

Volunteer Opportunities

- Welcome guests and assist them in planning and organizing their visit.
- Answer guest questions at the Information Desk.
- Prepare groups for missions and educational programs.
- Surveil the permanent exhibit and engage guests during their visit, including demonstrating Radio Frequency Identification (RFID) technology.
- Assist and manage the execution of Private Tours.
- Serve as the final touchpoint for guests in the Debriefing Center.
- *Additional opportunities available with our Sales and Retail team.

Volunteer Benefits

- Uphold a long tradition of giving back to the local community.
- Provide a critical role in the guest experience.
- Positively impact the reputation of the International Spy Museum.
- Professional development opportunities and Museum sponsored field trips.
- Museum store discounts.
- Exclusive previews and tours of the new Spy Museum at L'Enfant Plaza.
- Two free tickets to the Museum per year.
- Annual Volunteer Appreciation Event.

If you have any questions, please feel free to reach out directly to Kia Hunter, Volunteer Manager, at khunter@spymuseum.org or 202-654-0957.

MEMBERSHIP IN NGAA

We encourage all NGA alumni to join our ranks to maintain and deepen your professional and social contacts with the friends and colleagues you made from your time with the agency. Unfortunately, we can no longer offer the free membership underwritten by the Constellation Federal Credit Union as that institution has been absorbed by another credit union, which will not offer that same benefit. The NGAA-East Executive Committee is currently looking at other partners and sponsors who can offset some of our operating expenses and perhaps expand the services and experiences we can offer to our members. For a minimal cost of joining (\$40 for a lifetime membership) you get all this and more:

- Periodic newsletter to stay in touch with activities involving all NGAA and other alumni groups
- Roster with contact information of all members (not to be shared outside the membership)
- Spring and fall luncheons, one or both of which are held at NGA at their invitation.

These luncheons typically coincide with award ceremonies and/or optional unclassified update briefings. The Annual NGAA-East selection of an "NGA East Employee of the Year," from NGA nominees who have contributed significantly to the Agency's mission and their community. Selection is from NGA Campus East nominees:

- Opportunity to serve on committees that will interact with NGA on a variety of topics
- Opportunity to serve on committees that will interact with the United States Geospatial Intelligence Foundation (USGIF) on a variety of topics
- Opportunity to have input on issues brought to NGAA-East by NGA, e.g. development of an annual calendar to mark Agency milestones
- Opportunities for professional contributions to NGA's Pathfinder magazine as well as submissions to NGA paper/electronic internal employee communication capabilities
- Official venue to provide artifacts and/or memorabilia about NGA and predecessor organizations to NGA, USGIF, the Spy Museum and others
- Support to NGA exhibits and displays
- Ability to nominate former employees to the NGA Hall of Fame
- Interface with other Intelligence Community alumni groups through the Intelligence Community Alumni Network (ICAN); provides additional linkage with former colleagues § Access to Chapter information (and applications) at www.ngaaeast.org.

There are also multiple educational and social events throughout the year to include tours, lectures, wine tastings and happy hours

IN LOVING MEMORY

We are always saddened to learn of the deaths of our long-time members as well as spouses, friends, and colleagues with whom some of us have worked throughout our careers. Our heartfelt condolences go out to their loved ones, and friends. Please keep them in your thoughts and prayers.

We lost a long-time member of our community on Thursday with the passing of Jan Schneier. Jan had a passion for the mission and never forgot that there were men and women using our products, services and information - every day, in peace and war. Our heartfelt thoughts and prayers go out to Carrie and the family.

Jan Steven Schneier

Jan passed away on January 23, 2020 at age 63. Jan was born in New York City, New York to Max Schneier and Lillian Bloom on March 2, 1956. He graduated from SONY Albany and went on to take graduate courses at NYU. He married the love of his life, Carrie Salaway, on June 24, 1995. They spent the next 24 years together, raising their three kids, Zachary, Jordan and Noah.

In 1978, he began working at the National Geospatial-Intelligence Agency (NGA). Jan served in the Senior Executive Service for nearly 20 years. He retired from NGA in 2012, after 34 years as a civil servant. Jan was awarded the rank of Meritorious Executive in the Defense Intelligence Senior Executive Service in 2004, and the Distinguished Civilian Service Medal in 2012. Despite often insisting he wanted to leave the workforce, his kids joked that Jan was bad at staying retired. He went on to work at General Dynamics IT until 2018, and then retired again. In 2019, he started his own consulting firm GEO-IT supporting GDIT as a liaison to NGA.

To know Jan was to love him. He was the kindest, strongest, and most caring father, husband, brother, mentor, and friend. He was an incredible person who brightened the day of everyone who came in contact with him and would offer wisdom to anyone who asked. He loved to travel and had an endless list of places he wanted to go. He was a skilled woodworker and radio operator and loved the outdoors. Jan was a creative visionary with an encyclopedic knowledge about history, politics, and world affairs.

Jan is survived by his wife Carrie, his children Jordan and Noah, his brother Paul (Felice), his sister Randy Soderman (Peter), and his brothers and sisters in-law; Justin (Deb), Susan (Mitch), Ahni (Jim), Cynthia (Rob), George (Irene), and Libby. He is also survived by nieces, nephews, and their families. Jan had an amazing network of friends, colleagues, who loved him dearly and whose lives he brought joy and laughter into.

A graveside service was held on Sunday, January 26, 2020 at National Memorial Park Falls Church, VA. Contributions can be made in Jan's name to a charity of your choosing.

William N. Hogan

Fortified with the Sacraments of Holy Mother Church Saturday, February 1, 2020.

Beloved husband of 56 years to Carole Hogan (nee Noel); loving father of Kerry (Michael Hart) Hogan and Jeffrey (Cindy) Hogan; dearest grandfather of Morgan, Joseph, Brendan, Mallory and Ryan; dear brother of Edward (Joan) Hogan, Nickolas (Jean) Hogan, Dottie (Jerry) Eidson and the late Terrance (surviving Eileen) Hogan; dear uncle, great uncle, cousin and friend.

Services: The funeral mass was held at St. Gabriel Archangel Catholic Church, 6303 Nottingham Ave., Saturday, February 8, at 11:00 a.m. Interment Resurrection Cemetery. In lieu of flowers, contributions may be made to [Alzheimer's Association](#).

From the St. Louis Post -Dispatch

This statement was issued by Missouri State Representative, David Gregory.

WILLIAM HOGAN

Mr. Hogan retired from the United States Department of Defense. While working for the Pentagon, he was a Senior Intelligence Executive of an elite agency for the federal government. Mr. Hogan was responsible for directing and managing Department of Defense geographic intelligence resources for the conduct of military land, air and sea operations. He also served as a Department of Defense geographic representative to NATO, US Allies, international agencies and foreign governments. He received the United States Presidential Rank Award, the National Intelligence Award, and Department of Defense Meritorious and Distinguished Service Awards.

Mr. Hogan is a graduate of Webster University, Saint Louis University, and Massachusetts Institute of Technology (MIT). He is a St. Louis native and resided in South County.

Due to his extensive experience with the US Department of Defense and the interworking of governmental affairs, Mr. Hogan was asked to personally advise on Gregory's efforts to improve government efficiency and effectiveness.

Mary Murphy

Age 102, of Falls Church, VA, died January 31, 2020. Born August 14, 1917, in Hibbing, MN, the third of six children of John Philip Murphy and Ethel Robinson Murphy. She graduated Magna Cum Laude from Saint Lawrence University with a BA in French; she received a degree in Library Science with honors from the [University of Illinois](#).

During a distinguished and decorated career as a map librarian with the Army Map Service and the Defense Mapping Agency, she managed the development of an automated map retrieval system, served as editor of a bulletin of the Special Libraries Association, spoke at numerous conferences, and held various leadership roles. She rose to Branch Chief at a time when few women attained that professional level. After retirement, she stayed active in professional organizations, serving as president of both the Association of Mapping Seniors and the local chapter of Zonta International, a professional organization empowering women.

She made national news in 1947 when she survived a 60-foot fall from a cliff in Shenandoah National Park.

She was an avid ballroom dancer, an intrepid world traveler, and a prolific photographer. She was a long-time member of St. Patrick's Episcopal Church in Washington. She lived in McLean, VA, from 1967 to 2012, and spent her last years at Goodwin House, Bailey's Crossroads.

She always made time for family and was a beloved fixture at many gatherings. She was an inspiration and role model to many younger relatives. All who knew Mary recognized her indomitable spirit.

She is preceded in death by her parents and five siblings, and long-time friend and dance partner Roland Godin; survived by brother-in-law Hal Goolsby, eleven adoring nieces and nephews, and eleven grand nieces and nephews.

A memorial service was held February 16, 2020, at Goodwin House, Bailey's Crossroads.

In lieu of flowers, please make donations to: Zonta International Foundation or Goodwin House Foundation.

Published in The Washington Post on Feb. 6, 2020

Albert William (Bill) Dempsey, Jr. died in November 2019. He was the husband of Teri Dempsey, former NGAA-East and NGAA Board member. Teri wrote on the site posting his death:

“Bill (Albert) Dempsey was a very quiet man who enjoyed his family, pets, games and military history. His career spanned several forms of service to the US Government, first in the Navy where he ran nuclear reactors on ships thru many years at the National Imagery and Mapping Agency where he served as a computer security technician. I think one of our best family memories is when he would meet his mother-in-law deplaning and within a minute she was very unhappy with him just for being. He would laughingly tell that story and then note how she would slap her hand over her mouth to try and stop herself.”

Teri Dempsey - January 08 at 03:37 PM
