

# Col. Sterling Retires; Col. Schatzley New Commander

Today was the last day of active military service for ACIC Commander Col. Edwin L. Sterling. At retirement and change of command ceremonies yesterday (July 30), Colonel Sterling was presented the Air Force Distinguished Service Medal. The new commander is Col. Byron L. Schatzley.

The Distinguished Service Medal, which has other service counterparts, is the highest achievement award presented to members of the United States armed forces.

The citation reads as follows:

The President of the United States of America, authorized by Act of Congress July 9, 1918, awards the Distinguished Service Medal to Colonel Edwin L. Sterling for exceptionally meritorious service in a duty of great responsibility. Colonel Sterling distinguished himself as Commander, Aeronautical Chart and Information Center, from 1 November 1968 to 31 July 1970. During this period, Colonel Sterling directed the development and implementation of highly complex and unique geodetic and geophysical Aeronautical Chart and Information Center programs that have significantly improved the posture of the United States strategic and tactical forces. These improvements are measurable and contribute not only to a more effective striking power for the Air Force, but, in some cases, also significantly advanced Army and Navy strike capabilities. In addition, Colonel Sterling directed the Aeronautical Chart and Information Center technical breakthrough which exploited lunar orbiter photography that resulted in new charts and mosaics needed by National Aeronautics and Space Administration's Apollo 11 astronauts to land the first man on the moon. The singularly distinctive accomplishments of Colonel Sterling culminate a long and distinguished career in the service of his country, and reflect the highest credit upon himself and the United States Air Force.

Story and pictures on yesterday's events will appear in the Aug. 15 ORIENTOR.

## Col. Edwin L. Sterling

Colonel Edwin L. Sterling has been commander of ACIC since November 1968. He was also Director of Operations from 1962 to 1966. Before assuming command of ACIC, he was Deputy Director of Intelligence, Hq. Pacific Air Forces (PACAF) Hickam AFB., Hawaii.

A native of Chadron, Neb., Colonel Sterling attended college in Pasadena, Calif., where he received an associate degree in his

Command at San Marcos, Tex., where he served first as commander of a maintenance and supply group and then wing deputy commander.

In April 1956 Colonel Sterling was assigned to Hq. Flying Training Command, at Waco, Tex., as Inspector General. The following year he became Inspector General for the Air Training Command at Randolph AFB, Tex.

Colonel Sterling joined the U.S.

## Col. Byron L. Schatzley

The new Commander, Col. Byron L. Schatzley, is serving his second tour with ACIC. He was project engineer in the Directorate of Operations from 1960 to 1963.

Before assuming command of ACIC, Colonel Schatzley was commander of Hq. 548th Reconnaissance Technical Group (Pacific Air Forces), Hickam AFB, Hawaii, and also Director of Reconnaissance Production on the staff of

During World War II, Colonel Schatzley served as a B-26 crew member in England and flew 40 combat missions over Europe. For a mission flown against Prum, Germany, in 1944 he received the Distinguished Flying Cross for his performance as lead bombardier.

Upon return from Europe, Colonel Schatzley was assigned to the Photographic Laboratory.

## PDE, AC Tops In Suggestions For Fiscal Year

By Mrs. Norma Smith, Executive Secretary of the Incentive Awards Committee

The Office of the Comptroller won the Suggestion Plaque in the Administrative Support Activities category for the third consecutive year and Chart Research Di-

tory in 1939. He entered the military service at March Field, Calif., in July, 1941 as an aviation cadet. He received his pilot wings and commission as a second lieutenant the following year at Luke Field, Ariz., where he completed advanced pilot training.

Colonel Sterling's first duty assignment was with the 303rd Bomb Wing, Boise, Idaho, as a B-17 pilot. He accompanied the wing to the Pacific, where he participated in the end of the Battle of Midway.

Returning to the United States, he joined the 306th Bomb Group in Wendover, Utah, and was sent to England. He spent three years with the Eighth Air Force in England, and flew combat missions over Europe in the B-17.

After World War II, Colonel Sterling was assigned to Hq. Army Air Force at the Pentagon, where he served for two years as chief of the Technical Training Division in the Directorate of Operations. After a year at the Air Command and Staff College, Maxwell AFB, Ala., he returned to the Pentagon for assignment in Programs Analysis in the Office of the Comptroller, Hq. USAF. He subsequently was assigned as chief of the Special Studies Group, Directorate of Intelligence, at Hq. USAF.

In November 1952, Colonel Sterling joined Hq. Fifth Air Force, Seoul, Korea, as Director of Intelligence. While in Korea, he flew 35 combat and rescue missions.

Colonel Sterling returned to the United States in December 1953 and joined the Flying Training

Colonel Sterling joined the U.S. Air Forces in Europe (USAFE) in the summer of 1958 as deputy commander of the 49th Tactical Fighter Wing Etain, France. In February 1960 he became Director of Targets in the Directorate of Intelligence, Hq. USAFE.

## Mrs. Sterling Honored

A farewell remembrance is displayed by Mrs. Edwin L. Sterling, Aero Chart Woman's Club honorary president and wife of the retiring Commander. The presentation was made at a Woman's Club luncheon in May. Members and friends wish the Sterlings Godspeed in their new adventures.

sance Production on the staff of the Deputy Chief of Staff, Intelligence, Hq. PACAF.

A native of West Milton, Ohio, Colonel Schatzley entered active military service in June 1941. He received his bombardier's wings and was commissioned a second lieutenant in March 1943 upon completion of aviation cadet training.

the Photographic Laboratory, Wright Field, Ohio. In 1946 he attended a six-month aerial photographic officer course at Lowry AFB, Colo., followed by a short tour with the 509th Bomb Group at Roswell, N.M.

In September 1947 he entered Air Force Intelligence School at Lowry AFB. Upon graduation in June 1948, he was assigned to the 548th Reconnaissance Technical Sq. at Yokota AB, Japan. He returned to Lowry in September 1951 as an instructor in photo interpretation at the Air Force Intelligence School.

From 1953 to 1956, Colonel Schatzley served as chief of the Photo Interpretation Section in the Reconnaissance Laboratory at Wright-Patterson AFB Ohio. In 1956 he transferred his entire section to the Intelligence Laboratory, Rome Air Development Center, N.Y. It was redesignated the Reconnaissance Interpretation Branch, Hq. Air Research and Development Command. While stationed in New York State, Colonel Schatzley earned his bachelor's degree in social science from Syracuse University under the Operation Bootstrap program.

In September 1959 he attended the University of Indiana in Bloomington under a program of the Air Force Institute of Technology. He was awarded his master's degree in business administration upon completion of his studies there.

In September 1960 Colonel Schatzley was assigned to ACIC. He left here in June 1963 for assignment with the Policy and Pro-

(Continued on Page 2)

ductive year and Chart Research Division won the plaque in the Technical Services Activities category for the second consecutive year.

The Office of the Comptroller submitted a total of 52 suggestions during Fiscal Year '70 for a participation percentage of 41.6 per cent. These two areas were the only ones to reach the 30-per cent goal established by Hq. USAF and are to be commended for their continued support of this very worthwhile program. However, without support from all segments, ACIC fell short of the goal, attaining a participation rate of only 21.1 per cent.

The Incentive Awards Office distributed 498 ball-point pens during the year for eligible suggestions submitted while 29 radios have been awarded since Jan. 1 to authors of suggestions which were adopted but benefits derived were insufficient to qualify for the minimum award.

Pens and radios will be awarded on the same basis this year, and it is hoped we can make a better showing for Fiscal Year '71.

## UNIT MAPS VIETNAM

The Aerospace Cartographic and Geodetic Service (MAC) has completed a three-year photo survey of the Republic of Vietnam. The photomappers have been flying missions over the combat area in specially equipped C-130 transports. (AFNS)

# Col. Edwin L. Sterling

(Continued from Page 1)

Colonel Sterling came to St. Louis in August 1962 as ACIC's Director of Operations. Four years later he was assigned as Deputy Director of Intelligence at Hq. PACAF. He spent considerable time in Vietnam during this assignment and flew several combat missions there.

In the fall of 1968, his tour with PACAF was curtailed by Hq. USAF for reassignment to ACIC as Commander.

Of Colonel Sterling's 24 decorations, he has received the Air Force Distinguished Service Medal, presented yesterday (July 30) the Legion of Merit with one Oak Leaf cluster, the Bronze Star, the Air Medal, the Air Force Commendation Medal with one Oak Leaf Cluster, and the Army Commendation Medal with one Oak Leaf Cluster. During World War II he was decorated by the French Government with the Croix de Guerre with Gold Star.

Colonel Sterling says he "regrets very much" leaving the Air Force. "I've always had the opportunity of working with wonderful people in the Air Force.

"The people at ACIC are just magnificent. They're professional, hard-working, and dedicated. They fit every superlative." It has

been an honor and privilege to serve as Commander of ACIC."

Colonel Sterling and his wife, Shirley, are moving to Houston, where Colonel Sterling begins work Monday in the Aerospace Systems Division of the Lockheed Co.

Originally from Glendale, Calif., Mrs. Sterling met her husband while she was attending Occidental College in Los Angeles, where she was a member of the Phi Beta Kappa scholastic national honorary society. They were married in 1942, shortly before he left for the Pacific.

Colonel and Mrs. Sterling have a son, Michael, and a daughter, Marianne. Michael has been attending Meramec Junior College and plans to continue his education in Texas. He recently completed four years' service in the Air Force. Marianne will be a senior at Marymount College Tarrytown, N.Y., in the fall. She and Air Force 2nd Lt. Barry J. Britton plan to be married in the Cadet Chapel at West Point Aug. 26. A June graduate of the United States Military Academy at West Point, Lieutenant Britton is now working toward a master's degree in advanced photo optics at the Institute of Technology in Rochester, N. Y.

Colonel Schatzley has published research papers on photo interpretation and aerial reconnaissance. He also holds a patent for an Oblique Aerial Photographic Plotting Template.

Colonel Schatzley's decorations include the Legion of Merit, Distinguished Flying Cross, Air Medal,

grams Group, Assistant Chief of Staff, Intelligence, at Hq. USAF. While serving with the ACS/Intelligence, he became chief of the Policy and Programs Branch, then chief of the Reconnaissance Branch and finally chief of the Reconnaissance Division.

Dr. Richard Wier and Wallace Gatewood, second and third from left respectively, discuss career advancement with ACICers. Robert J. Clopton (DPCT), who made the arrangements for the interviews, observes.

## Visitors Do Research Here In 'Upward Mobility' Study

by 1st Lt. Paul Hurlburt

A professor from Lindenwood College in St. Charles and a graduate student from Washington University have been studying career advancement in the lower grades levels at ACIC. The aim of the project is to develop a model "Upward Mobility action plan" for use by Federal agencies.

Dr. Richard Wier, who teaches political science at Lindenwood, and Wallace L. Gatewood, who is working toward a master's degree in business at Washington University, have been hired by the U.S. Civil Service Commission as part of its nationwide Summer Faculty Program.

Both are assigned to the St. Louis Region of the Civil Service Commission, which made the arrangements for the study at ACIC.

Dr. Wier, who is being assist-

if they were satisfied with their career patterns. They were also asked to describe any problems they have experienced.

Dr. Wier and Mr. Gatewood are also interviewing supervisors to learn first-hand their understanding of Project TEACHES and related programs, what they are doing to aid their subordinates and any opinions they may have about these programs.

Dr. Wier is also giving attention to career advancement as it relates to black people and women.

### How People Move Up

In gathering statistical data, Dr. Wier is trying to establish a pattern of how people have moved up within the ranks over a period of years. "A lot of this analysis has been done," he said, adding that he will use the information in developing his Upward Mobil-

## EDITORIAL

### Is It Sensible?

Overextension of credit is not an unknown failure. Actually it is a fairly common trait, simple to acquire. Everyday hucksters take aim at our pocketbooks and our credit cards. It is suggested on television, in newspaper advertisements, and through mail circulars that we overload the home with every kind of gadget, bought on time.

The military has a built-in baffle to overpurchasing - frequent change of station. The greater the accumulation, the more costly the move is apt to be.

This is one reason to develop a habit of saving. Various guidelines are offered concerning the financial reserve we should have, but one-figured rules are impossible to apply. A universally accepted conclusion is that the older the head of the household, the greater the reserve should be.

One study puts the minimum savings for any family at \$2 000. And as retirement draws nearer, the reserve should increase. For a family of four it should be a minimum of \$3,500 at age 50, \$8,100 at age 55, \$13,100 at age 60 and at retirement age, 65, a minimum of \$20,400. Hedging for inflation, add 10 per cent.

Remember these figures when the television announcer suggests that you buy a better and bigger mousetrap. It's money you need for protection against emergencies - not mousetraps. (AFNS)

## Bits And Pieces

From the Black Book:

The change of command now complete, we extend our best wishes to Colonel and Mrs. Sterling in their future endeavors and

Colonel Schatzley went to Hawaii in July 1967 for duty as deputy commander of the 548th Reconnaissance Technical Group. He assumed command of the Group in January 1969.

Colonel Schatzley is a recipient of the Distinguished Flying Cross, Air Medal, Bronze Star and Air Force Commendation Medal.

The colonel and his wife, Cora, have two daughters, Jill, 19, and Linda, 16.

## SIDELIGHTS ON ACIC HISTORY

# Chart Research's Move to St. Louis

By Dick Barnard  
Command Historian

Do you remember when Chart Research Division moved from Washington to St. Louis? If so, chances are that you are an ACIC veteran of at least 13 years standing.

As part of the progressive consolidation of ACIC functions in St. Louis in the 1950s, Military Air Transport Service, ACIC's then parent organization, was presented in June 1956 with a plan to move the principal functions of the Chart Research Division from Detachment 1 in Washington to St. Louis. Late in December 1956 authorization to proceed with the move was received by ACIC.

An ACIC operational plan governing the move was issued and two committees, one each in Washington and St. Louis, were formed to coordinate the multitudinous details. Planning and initial implementation proceeded throughout early 1957.

On 1 July 1957 the principal shipments of equipment and materials to St. Louis were initiated. The entire movement was completed on 22 July 1957. In all 38 trucks had transported 682,000 pounds of equipment and materials.

At the same time as the physical possessions of the Division were being moved, employees of Chart Research Division also began their exodus from Washington. A total of about 130 persons ultimately made the journey from the Potomac to the Mississippi. Late July was spent in unpacking and settling into the new quarters. By 1 August 1957 the Division was fully operational although temporarily working with reduced capabilities. Mr. E. M. Thompson, presently Assistant Chief of Production and Distribution Plant, was Chief of Chart Research Division at the time of its move to St. Louis.

Dr. Wier, who is being assisted in the study by Mr. Gatewood, said ACIC was chosen for the project because of the Project TEACHES program, which is already underway here. In addition to Project TEACHES, he will be studying and evaluating various aspects of career advancement for lower grade-level employees at ACIC.

### Interviewing ACICers

Dr. Wier said he planned to spend approximately six weeks at ACIC interviewing employees, supervisors, and gathering statistics of career advancement. He also plans to conduct a similar study at the Department of Internal Revenue in St. Louis as part of the Upward Mobility project. He will then present his findings and recommendations for an Upward Mobility program to the St. Louis Region of the Civil Service Commission.

In addition to developing a plan for a model Upward Mobility program, Dr. Wier is looking for improvements that could be made in ACIC's Project TEACHES program as it now exists.

"We're interested in the nuts and bolts of what ACIC can do now - - even with the personnel cutbacks," he said.

Recently he and Mr. Gatewood spent a day at both Second Street and South Annex interviewing participants in the Project TEACHES program, as well as non-participants who are in comparable grade levels. The employees were asked

in developing his Upward Mobility plan.

"Upward Mobility" is the name given to Civil Service Commission programs concerned with the advancement of lower grade-level employees.

Dr. Wier is one of 25 college professors working on numerous projects as part of the Commissions' summer faculty program. Other projects are concerned with such matters as training for executive level employees, long-range personnel planning requirements, and health programs for civil service employees. Dr. Wier is the only person in the program concerned with the Upward Mobility.

### The Visitors

A native of St. Louis, Dr. Wier received his master's degree in history from St. Louis University. He received his Ph.D. in comparative politics with a minor in American Government from Georgetown University. He has been on the Lindenwood faculty since 1968.

Mr. Gatewood is originally from West Bend, Ky. He received his B.S. degree from Berea College in Kentucky and he is now studying labor and personnel management at Washington University under a fellowship from the Consortium for Graduate Study in Business for Negroes. One of 20 graduate students hired under the Summer Faculty Program, he is working on his own project with the St. Louis Region in addition to helping Dr. Wier.

ling in their future endeavors and offer our heartiest welcome to Colonel and Mrs. Schatzley.

Last year when I left on vacation I promised so many people I'd bring them fish upon my return. This year I've made the same promise and undoubtedly will bring back the same results - - nothing. At least while you read this I'm out toiling away on the creek bank trying to fulfill my promises. It will be hard for me to lounge under a big shady oak and catch fish at the same time, but I'll try.

## ACIC Employees Receive Awards

Master-Sgt. Eric W. Alexander (PDMRA) on reserve duty with the Missouri Air National Guard at Lambert Field.

## MSgt. Alexander TAC's Top Intelligence NCO

Master Sgt. Eric W. Alexander has been selected "Outstanding Unit Intelligence NCO" in the Tactical Air Command for 1969.

A photo superintendent in Unit 1 of the Reproduction Services Branch (PDMRA), Sergeant Alexander serves with the Missouri Air National Guard at Hq. 131st Tactical Fighter Group, Lambert Field, St. Louis. He was chosen for the award from both active duty and reserve intelligence NCOs throughout the Tactical Air Com-

mand.

The citation said Sergeant Alexander's "ingenuity and initiative were outstanding in planning and implementing a highly workable system of classified storage and retrieval within serious space limitations."

He was also cited for his efforts as on-the-job training supervisor of all intelligence airmen assigned to the Fighter Group.

Sergeant Alexander entered the military service with the U.S. Army in 1949. After release in January 1950, he transferred to the Air Force Reserve and was recalled in May 1951. Upon release from active duty in 1952 he rejoined the Air Force Reserve and ultimately enlisted in the Air National Guard in 1965.

Sergeant Alexander first came

## Dominic Biagioli Dies Unexpectedly

Dominic P. Biagioli, a mathematician in the Management Analysis Branch (ACM), died unexpectedly July 16 in St. Joseph Hospital in Kirkwood. He was 48 years old.

Originally from Ladd, Ill., Mr. Biagioli received his B.S. and M.S. degrees from Marquette University in Milwaukee. Before coming to ACIC in 1955, he taught mathematics and assisted in coaching football at high schools in Stephenson and Escanaba, Mich.

At ACIC he first worked in the Projection Office. Among his accomplishments while assigned to this office, he formulated the present-day navigational grid system used in navigation across the polar and sub-polar regions. He also calculated the projections of charts used in the downrange area from Cape Kennedy.

Later transferred to the Office of the Comptroller, Mr. Biagioli was involved in the application of mathematics to computer concepts. He was chief of the Applied Mathematics Branch in the Data Processing Division before joining the Management Analysis Branch.

Mr. Biagioli leaves his wife, Mary, and eight children. Mrs. Biagioli is a mathematician in operations research at the Army Aviation Systems Command (AVSCOM), 12th and Spruce Streets, St. Louis. Earlier this year she was selected by the Secretary of the Army as one of six Depart-

Dominic Biagioli

ment of the Army nominees for the annual Federal Woman's Award.

Mr. Biagioli's funeral was held July 20 at St. Margaret of Scotland Church, 3854 Flad. A veteran of World War II, Mr. Biagioli was buried in Jefferson Barracks National Cemetery.

## WILLIAM MASON DIES

William Mason (ACIS) died July 8 after a long illness. Mr. Mason, formerly a security policeman, had been employed at ACIC for 16 years.

His funeral services were held at the Kutis Funeral Home, 2906 Gravois. He was buried in Indiana.

Burchard

The ACICers pictured above recently received awards.

In the top row, from left, Edith Grob (PDCC) and John Harmon (PDEW) each received both a Quality Salary Increase and Outstanding Performance Award, while Robert Lachnit (PDCX) and Homer Kelly (ACA) each received a Quality Salary Increase.

In the second row Warren Wolfrom (PDCX) and Joseph Mullins (PDEGS) each received a Special Achievement Award. David Caverly

(PDEP) received both a Special Achievement Award and Outstanding Performance Rating, and Bartley Higgins (PDEW) received an Outstanding Performance Award.

In the third and fourth rows, the following received 20-year Federal service certificates: Richard King (PDCX), Ramon Boofer (PDCS), Edward Lealos (PDADB-4), Charles Marshall (P-DCC), James Kelly (PDCC), Claude Sides (PDCC), Charles Self (PD-CC) and William Burchard (PDCC).

Sergeant Alexander first came to ACIC in August 1944. He and his wife, Maybelle, have four children.

## PROMOTIONS

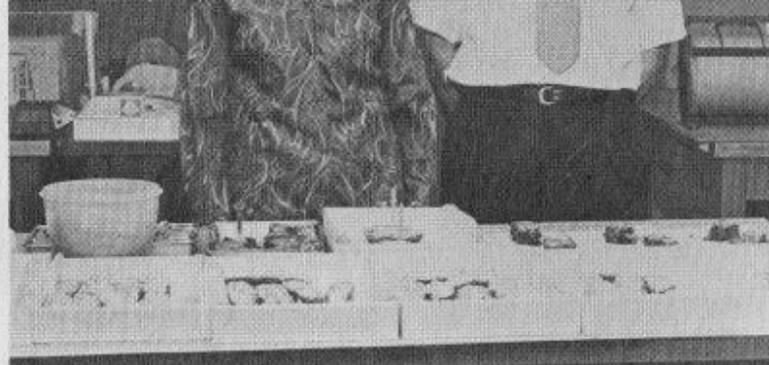

The following employees have received promotions to the grades indicated through the ACIC Merit Promotion Plan: Alvina G. Apel (GS-7), William A. Chamberlain (GS-12), William W. Dickinson (WG-10), George S. Keil (GS-12), Ralph F. Knost (WB-19), Walter J. Shuster (WB-17), Ann L. Stanfill (GS-6), Anita M. Weber (GS-8), Thelma E. Wheeler (GS-7).

The following action removes the Temporary Limitations placed on the original action: Philip Rahall (GS-15), Irvin E. Rogers (GS-14).

The following employees have received promotions through Job Enlargement: Betty J. Borders (GS-4), Frank J. Cimicata (GS-12), Edward D. Lurton (GS-14), John Solima (GS-12).

The following employees have received promotions from positions of known promotion potential to the grades indicated: Bruce A. Bauer (GS-11), Dick K. Chin (GS-11), Robert H. Clevenstine (GS-11), Nancy J. Foppe (GS-4), Doris M. Guerke (GS-6), Robert L. Hudzik (GS-11), William Leong (GS-12), Ann V. Steiger (GS-4), Charles E. Youngberg (GS-9).

The following employees have received promotions to grades from which they were downgraded without personnel cause: G. W. Harper (WS-5), Doris Lee (GS-5).

Mr. and Mrs. Earl Hayden preside over a table of goodies in PDAP. Mr. Hayden retired today, but you might say that Mrs. Hayden did, too. She has been baking cookies and cakes for birthdays of ACICers in PDAP for the past five years. Every month the employees got together to celebrate the birthdays of the month and enjoy her outstanding treats. Mrs. Hayden never appeared on these occasions until the final one this month, when the picture was taken.

## Earl Hayden Retires Today

Earl L. Hayden (PDAP) retired today (July 31) after more than 18 years of Federal service, 15 of them at ACIC and the others in the U.S. Navy. He was a line officer and combat pilot in the Pacific during World War II.

Mr. Hayden and his wife, Annie, both hold pilot licenses and plan to do some traveling by air now that he is retired. Mr. Hayden says he also plans to "accelerate" his activities in the various fraternal orders to which he belongs.

"My wife and I were married in 1922 and celebrated our 17,532 day (48 years) of married life June 24," Mr. Hayden said. "Our greatest pride and joy is our family,

which consists of our son James, and his wife Maryann, six grandchildren and one great grandson. Two grandsons have completed college and are married. One grandson is in the U.S. Navy and another is in college."

Mr. Hayden also said, "Upon leaving ACIC I want to express my heartfelt appreciation and thanks to a lot of friendly people for the assistance and pleasure they have extended me. While having been constantly involved in problem solving, I realize we could not always see eye to eye on all solutions, but I am sure we part in a spirit of friendship and mutual respect."

# Chargers Unbeaten as Play Ends in ACIC Closed League

By James Williams, PDCCA-3

With only one rained-out game remaining, between the Cougars and the Twins and the outcome of which will not affect the league standing, the ACIC Closed Industrial Softball league ends its regular play.

After the dust had settled, the Chargers stood undefeated, 12-0. They overwhelmed opponents by scores of 13-5, 15-6, 11-7, 18-9, 13-2, 18-3, 15-4, 18-3, 8-4, 26-4 and 22-5. One game was won on forfeit when the opponent failed to show for the game.

The most thrilling game of the season was played July 15 when the Red Birds who had previously been beaten 11-7 by the Chargers were hoping for a victory to even the Division Standing, thereby forcing a playoff for the Division Championship. This was not to be however, and before the largest crowd of the year the Chargers crushed the Red Birds 22-5 (in 5 innings). The powerful Chargers hit five legitimate homeruns in one inning. Three of them were hit back to back, accounting for seven runs in that particular inning. If there was any doubt about who was

champion, it quickly vanished after this powerful offensive attack displayed by the Chargers.

Some of the Charger stars are as follows: James "Dick" Williams. Livingston "Homerun" Sykes (He hit the longest homerun ever seen at Berra Field; most people thought the ball had been fired off by a Saturn rocket and was headed for the moon), Carl "Flash" McReynolds, Albert "Richie" Walker, Lafayette Gatewood and John Lefman.

## Airman of Quarter

### SSgt. Stamp: A Profile

Staff Sgt. Henry C. Stamp has been chosen Hq. ACIC Outstanding Airman for the second quarter of this year. He is an inventory specialist in the Supply Division.

Sergeant Stamp was cited for his role in converting punch card accounting machine procedures to the new computer system used by Supply. A recommendation noted that he "gave of his time unselfishly, spending many hours overtime including weekends to accomplish the conversion."

Now assigned to the inventory section, Sergeant Stamp is responsible for supply and equipment quantity accuracy. He was praised for his performance in this job as well.

Originally from Bemidji, Minn., Sergeant Stamp joined the Air Force upon graduation from high school in 1960. His first assignments were Duluth, Minn., and Kadena AB, Okinawa. In 1964 he went to Greece, where he served with a small detachment in Larissa. "We lived strictly on the local economy," he says. "To eat, I had to learn how to speak Greek."

Sergeant Stamp was relaxing on a beach of the Adriatic Sea when he met his wife, Despoina. They were married in a big Greek Orthodox wedding in August 1966. Mrs. Stamp then joined her husband in Grafenwohr, Germany, the assignment he held before coming

to ACIC.

The Stamps have a three-year-old daughter, Rallou. She was born in Germany, and Sergeant Stamp says she has her choice of German, Greek or U.S. citizenship.

"I'm hoping she'll choose American," he says, "but we speak Greek with her at home; it's part of her heritage."

Sergeant Stamp and his family live in Affton, and he is the manager of the apartment complex where he lives.

## Suggestion Brings Sergeant \$265

Sergeant James M. Preston (PD-AM) recently received \$265 for suggesting an innovation in the production of enroute charts.

Previously his unit received a plastic composite positive sheet of each enroute chart from the commercial printer that prints the charts. The composite sheet was used as a base for drafting the next version of the chart, since enroute charts are updated at regular intervals. Sergeant Preston suggested that the composite sheet be eliminated and that existing plastic sheets for each of the different colors be put together to form a composite for drafting pur-

## SARGE SEZ ...

By CMSgt. Harry A. Gault

I am sure all enlisted men join me in wishing Col. Sterling the best of luck in his new civilian career. It has been a pleasure for all of us to have served under his command.

-0-

A recent military personnel center survey revealed that over 95 per cent of the Air Force's 660,000 enlisted men possess at least a high school degree, 17,000 Air Force enlisted men hold bachelors degrees and 500 have earned masters or doctors. Among the officers 82 per cent hold college and advanced degrees.

-0-

The National Center for College Admission says it is happy to help Air Force men gain admittance to a college of their choice. There is no charge for the service if you qualify for veterans benefits. For application forms and additional information write the National Center for College Admissions, 1301 West 22nd St., Oak Brook, Ill.

## We Asked Them...

"What is the reason for the high divorce rate?"

THEY ANSWERED...

"There's such a high divorce rate because people get married for reasons other than love and compatibility. They don't have any feeling for each other. This thing's got to be a two-way deal, you see what I mean? It's a give and take thing, and some people don't like to give. That's why I'm going to wait."

- Willie Mae Presberry, DC.

"Too many women working. Well, I

## Military Arrivals And Departures

Three officers and 15 airmen were announced at July Commander's Call. They are Capt. Douglas R. Nolte, who arrived July 1 from Duluth International Airport, Minn., and is attending the Cartographic School prior to further assignment in this

"Too many women working. Well, I have it in my neighborhood. Kids run around; they don't have any direction. The woman feels like she's making as much money as the man. They're just not interested in the home anymore. They're competing. It's more a material thing than the family.

— George Modzelewski, PDCSC

"I don't know. I'm afraid I can't answer that. Maybe with the world in an uproar, people can't seem to get along. People get married and act like they're not married. I think if people were closer to God if they'd lead a Christian life, there wouldn't be any divorce. That's true. My pastor has said that many times."

— Robert Black, DEVM

"Real simple. Men and women. (Why do you say "Men and women"?) Did you ever hear of a dog and cat getting a divorce? Oh, they're just people; they just don't get along together. Fundamentally, men have become dependent and women have become independent."

— Emil Wilson, PDCXB-1

A DRUG is a substance that has an effect upon the body or mind. Drug dependence is a state of psychological or physical dependence, or both, which results from chronic, periodic or continuous use. Many kinds of drug dependence exist; they all have specific problems associated with them.

Not everyone who uses a mind-altering chemical becomes dependent upon it. Alcohol is one common example of this point. The majority of persons who drink do not harm themselves or those around them. However, more than 5 million Americans are dependent upon alcohol. (AFNS)

form a composite for drafting purposes. Savings from the suggestion were calculated to be \$4,260 in the first year.

Sergeant Preston has been assigned to PDAM since June 1969. He previously served with the

7650th ACISq. in Germany. He is originally from Milwaukee and was chosen Hq. ACIC Outstanding Airman for the last quarter of 1969.

Sgt. Preston

## Awarded Meritorious Service Medal

Technical Sgt. Robert L. Dudley (left) receives the Meritorious Service Medal from Lt. Col. Vernal G. Ogden, commander of the 7651st ACISq., Hickam AFB, Hawaii. Sergeant Dudley's wife, Gail, an Air Force technical sergeant with the 548th Reconnaissance Technical Group at Hickam, attended the ceremony. Sergeant Dudley distinguished himself in the performance of service in the Target Materials Division, 544th Aerospace Reconnaissance Technical Wing (SAC), Offutt AFB, Neb., from August 1969 to May 1970. Prior to his SAC assignment, Sergeant Dudley served in Japan. He is now NCOIC of the Quality Control Section, FLIP Branch, at the 7651st.

There was one officer loss: 1st Lt. Robert L. Wayman, who left July 18 for assignment with AFIT, Wright-Patterson AFB, Ohio, with permanent duty at Arizona State University.

There was one airman arrival announced at July Commander's Call: SSgt. Harold L. Watson Jr. arrived July 1 from Chanute AFB Ill. and is assigned with DMS.

Four airman departures were announced at July Commander's Call. TSgt. Robert L. Jackson is scheduled to leave Aug. 17 for assignment with the 1973rd Communications Sq., Udorn Royal Thai Air Force Base; TSgt. James D. Steele left July 15 for assignment with the 31st Combat Support Group, Tuy Hoa AB Vietnam; SSgt. Eugene D. Bryant left yesterday (July 30) for assignment with Det 10, 1131st USAF Special Activities Sq., Tan Son Nhut AB, Vietnam; and AIC Donald P. Giraudo left Monday (July 27) for assignment with the Technical Training Center at Chanute AFB Ill.

### OFFICERS ADVANCE

Major David A. Lindsey (ACA) and Maj. Joseph Walchshauer (DMS) each recently received Regular Air Force Commissions. First Lt. Robert J. Marx (DEVG) was promoted to his present rank June 5.
