

Joint DMA Effort Produces Costa Rican Chart

Through the combined efforts of the DMA Inter American Geodetic Survey (IAGS) and the Aerospace Center a new 1:500,000 chart has been produced for Costa Rica.

IAGS had been working for sometime with Costa Rican mappers in an effort to produce the new chart but ran into a snag when they found the final version was beyond their printing capability. Since the chart was aeronautical in nature DMAAC was asked if they could handle the printing requirements.

Following an evaluation of the requirements it was determined that the Center could print the chart. After a final edit had been performed in the Cartography Department the new item was assigned to Printing.

Henry Amptmann, pressman on the five color press, checks the special Costa Rica chart during a press run. The chart was a cooperative effort between the government of Costa Rica, IAGS and DMAAC.

Aircraft Display to Highlight Scott Armed Forces Day

Armed Forces Day will be highlighted May 17 with an Open House at Scott AFB for interested members of the military and civilian communities.

The base will be open to the general public from 10 a.m. until

aircraft dedicated to aeromedical airlift; the McDonnell-Douglas F-4 and F-15; the Navy F-14 and A-5; a T-37 from the Air Training Command and possibly a C-141 and C-5.

Volunteers Sought For St. Louis Outreach Program

Volunteers are being sought among the St. Louis area Department of Defense agencies for the annual Outreach Program to be conducted this summer.

The Outreach Program, which is supported under the Department of Defense Domestic Action Program, is designed to provide camping and outdoor experiences for youth of the inner city. Last year more than 1300 youth were aided in education, character development, citizenship training and physical and mental fitness through the Outreach Program.

Department of Defense agencies which supported the program last year and who have been contacted again this year are DMAAC, U. S. Army Reserve Components

Personnel Center, Army Administration Center, Army Troop Support Command, Army Aviation Systems Command and the 102nd Army Reserve Command.

Twelve to fifteen volunteers are being sought by DMAAC to participate in the program which covers the weeks of June 22-28, July 27-August 2 and August 3-9. Each volunteer will be required to assist in the youth camp supervision during one of the three weeks. Selection of the Outreach Leaders will be made based on outdoor background, youth interest and mission requirements.

Outreach leaders will be supervising boys in the 11 to 14 years age group. Camping will be

done at the Beaumont Scout Ranch located west of St. Louis on Interstate 44.

Interested employees should contact Richard Bakersmith, Center coordinator, on extension 4152 for more information and application forms.

Special training sessions will be arranged for those selected as Outreach leaders to prepare them to be better equipped to manage and give leadership to the inner city youth group.

May Bond Month

The month of May is "Bond Month" at DMAAC according to Deputy Director Colonel James St. Clair, this year's chairman for the 1975 Savings Bond Campaign. The theme for the campaign is "Take Stock in America — and in your future." The Center's goals are to increase our participation to at least 80% and to have at least 25% of the present bond buyers increase their allotment.

This year's campaign began last Tuesday with a "Kickoff" meeting for project officers and key

general public from 10 a.m. until 4:30 p.m. that day, with static displays depicting the Air Force mission and a DMAAC exhibit on aeronautical charting. Aircraft exhibits will include the C-9A Nightingale, the only Air Force

Other activities to be included in the day-long event will be a concert by the Military Airlift Command Band, Air Force sentry dog exercise demonstration, and model aircraft racing.

Rep. Symington Addresses St. Louis AFA Chapter

Events in Indochina "do not affect our strength as a nation and should not affect our reliability as an ally," Representative James Symington (D-MO.) told the more than 200 persons attending the Greater St. Louis AFA Chapter First Annual Outstanding Airman Dinner April 18th.

Honored at the dinner was Air Force SSgt. Stephen Boots, administrative specialist with the Air Force ROTC Detachment 435, St. Louis University, St. Louis, MO.

Sergeant Boots was chosen as the Greater St. Louis Outstanding Airman after competition with nominees from the Air Guard, reserve and active duty Air Force organizations in the metropolitan St. Louis area.

Chapter President, Donald Kuhn, presided over the dinner and presented a special plaque and citation to the honored airman.

As the main speaker, Congressman Symington spoke of American defense posture and the current world situation.

According to Symington, the end of military involvement in In-

dochina will result in the U.S. better being able to honor long-standing ties and commitments elsewhere in the world.

"Part of our strength as a nation is our capacity for self-criticism," said Symington. "But let no one view words of anguish as signs of decline. Our national strength, despite some recent doubt, remains undiminished. Our readiness to act in our national interest as we perceive it is still firm. Nations with whom we have long-standing ties or treaty commitments should know that we remain their friends, that our continued support can be relied on, and that we are not turning our backs on the world."

On the subject of the defense budget, the congressman said economic considerations will be an important factor in congressional consideration of the proposed \$104.7 billion defense budget. He told the audience that he expected Congress to target defense spending against predictable enemy threats which can be met with minimum disruption to the economy.

The first of many Center Savings Bonds displays is put up in the hallway of Building 36 by the Center Savings Bond campaign chairman, Col. James St. Clair and three lovely assistants, from left, Barbara Korn (RDN), Pat Morrow (RDGS) and Sandy Johnson (RDS). The displays will use the theme, "Take Stock In America," through the payroll savings plan.

AF Gets Quick Camera

The Air Force has successfully flight-demonstrated a reconnaissance camera that reduces the time lapse between photography and photo interpretation to about 10 seconds.

The electronic camera system is unlike any camera currently used in Air Force reconnaissance. It was developed by the Air Force Systems Command's Air Force Avionics Laboratory at Wright-Patterson AFB. It uses television-like technology to take high-quality pictures at medium and high altitudes, instantly transmitting them to the ground.

The pictures are displayed as still photos on a highquality TV screen. For photo interpretation of unknown targets, these "stills" are more useful than a constantly changing picture, say project officers. Moreover, part of any picture can be enlarged up to 10 times its original size in the photography.

In addition to displaying the photographs on the TV-like screen, the new system records them simultaneously on film. Officials say that a photo interpreter could adequately "read" most pictures

in three to 20 seconds because of their extreme clarity and detail. Air Force flight tests of the system are scheduled to resume this month and should be completed in August.

The project officers for the various organizations are:

Savings Bond Way*

workers. Highlight of the program was a presentation by Earl York, State Director of the Treasury Department's Savings Bond Division on the benefits of the Savings Bond program including a showing of the Savings Bond film starring the "Odd Couple," Tony Randall and Jack Klugman.

During the campaign period, keyworkers will be contacting each employee to explain the Savings Bond program and encourage participation by joining the payroll savings plan. Bonds continue to be an attractive investment — Series E Bonds pay 6% interest when held to maturity of 5 years and can be purchased through payroll deduction for as little as \$3.75 per pay period.

Women's Year

Equality, Development, Peace

International Women's Year (IWY) 1975 is underway. It is a year-long program with three goals: to promote equality between men and women; to integrate women into the total social and economic development effort of nations; and to recognize women's increasing contribution to strengthening world peace. The goals are summed up in the theme, Equality, Development, Peace.

Initiated by the United Nations Commission on the Status of Women, IWY '75 was approved by the General Assembly in December 1972. U. S. Presidential Proclamation of January 30, 1974, proclaimed 1975 as IWY for the United States, calling upon Congress, interested groups and organizations, officials of the Federal, State and local governments, and all others who can be of help to work for the observance of the year with practical and constructive measures for the advancement of women.

Within the Department of Defense, members of the Federal Women's Program, directors of women in the Services, and representatives from OSD and defense agencies are developing guidelines for special activities in July when, according to the IWY calendar of months, women's achievements in government service and defense will be recognized. The DOD program is aimed at encompassing all women in defense, including Servicewomen, civilians and dependents, nationally and internationally.

DMA plans to participate in the International Women's Year by establishing a visible DMA Federal Women's Program. Coordinators from the DMA Components, who are all newly appointed, gathered during March to establish a coordinator network, exchange ideas and receive in-

Mrs. Gill

structions and guidance from the DMA FWP Coordinator, Marian Hardy.

DMAAC's Federal Women's Program coordinator is Charlene Gill. She has been in Federal service for 26 years serving as a cartographer in the stereo-plotting and edit fields from 1948 to 62, a supervisory cartographer from 1962-70 and from 1970 until today in various staff positions in the Engineering and Production Management Offices of Missile Support Department.

In 1967, Mrs. Gill was the Center's nominee for Federal Woman of the Year. She has served in the American Society of Photogrammetry as speaker at the National Convention in 1964, publications chairman in 1971-72, historian 1972-73, secretary in 1973-74 and elected to the ASP St. Louis Region Board of Directors for 1974-77.

Bits And Pieces

From the Black Book:

Perhaps the most satisfying of all human feelings is the sense of individual accomplishment gained as a result of one's own ability and creativity. Charlie Guenther, the quiet, dedicated librarian who recently retired from the Tech Library, is one person who certainly can claim a great deal of individual accomplishment. Nominated for a Pulitzer Prize; recipient of Italy's highest honor; author of numerous poems; recognized by his peers for outstanding contributions to the arts — are certainly reasons for great self-satisfaction. But the thing I will remember best about Charlie Guenther is the unselfish giving of himself not only in his duties as a Federal employee but in his personal life as well. He has served and served and served on various committees, panels and societies for the improvement of the arts. His encouragement of young authors has started many a career. His patience and perseverance have provided the Aerospace Center with one of the best reference libraries of any industrial or government firm in the midwest, an accomplishment at times taken for granted. We look forward to seeing more of the Guenther poems and translations as he enters his retirement from Federal service.

AD Men Praised For AVSCOM Support

Three members of the Aeronautical Information Department workforce were praised in a letter of appreciation sent recently to the DMAAC Director.

The letter, from the U.S. Army Aviation Systems Command, acknowledged responsive support provided to AVSCOM by Frank Gotay, Richard Burroughs and Kenneth Schlarman.

According to the letter, "An

urgent requirement originated on 3 Apr 75 for certain unclassified information on a number of military airfields." The data was assembled by AD and delivered to the requestor by the morning of April 4th.

"This fast and successful effort was an excellent example of responsive inter-agency support . . ." reported Thomas J. Keenan, deputy director of Procurement and Production for AVSCOM.

DMAAC Blood Program — Facts You Should Know

For several years now, we have been participating in the blood donation program co-sponsored by

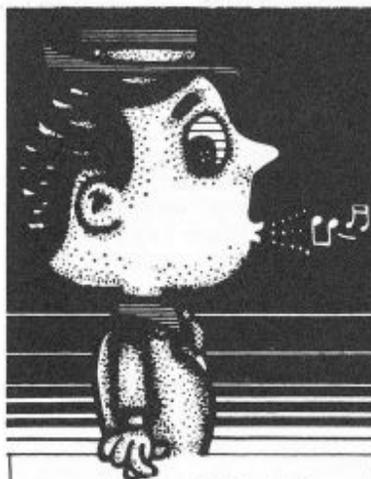

sfused, for example, \$22.00 for whole blood. This charge covers the cost of collection, processing,

medical history plus light refreshments.

Since the average person has 13

The ORIENTOR is an official newspaper, published bi-weekly on Friday by and for the personnel of the Defense Mapping Agency Aerospace Center, at St. Louis, Missouri. Opinions expressed herein do not necessarily represent those of the DOD.

Col. Donald D. Hawkins
Director

David L. Black
Chief, Office of Information
Editor

the Missouri-Illinois Regional Red Cross and DMAAC.

It is estimated that 700 units of blood are needed every day to take care of the hospitalized patients in the St. Louis area. The availability of that person's blood type immediately, when it is needed, makes the difference between life and death.

The program provides all the whole blood used by any member of the Center, member of his household, his parents and parents-in-law, grandparents and grandparents-in-law, wherever they may live, in any hospital in the U.S. that accepts blood through the Red Cross. Coverages also include DMAAC retirees and their spouses. This protection, which is in effect for twelve months, begins the day our quota, equal to 25% of authorized personnel, is accepted. The 1975 quota is 808 productive units. However, to support efforts stated in the HEW's National Blood Policy of all voluntary blood donation systems, a goal of 840 units has been set as the achievable target. This means 70 donors are needed every month.

Should our quota not be met, only those persons who have been donors will be eligible. Their protective coverage also applies for twelve months from date of last donation, with same family coverage as stated above.

As a participating blood group, a member will not be charged for the blood itself. There is, however, a processing fee for each unit of blood or blood products trans-

ported and transportation of the blood or its products and will be covered by most major medical hospitalization insurance programs. The cost of a pint of blood itself from any source other than the Red Cross Blood Program is usually \$35.00 to \$75.00, depending on the blood group and its availability.

Some hospitals that have their own blood banks may require two (2) pints for each one (1) actually used. However, all hospitals in the St. Louis area forfeit the bonus units if the patient is covered through the Red Cross Blood Program.

All blood requests must be made through the Dispensary (telephone 268-4047) or Herbert Kadowaki, program coordinator, telephone 268-8364. The request should be made while the patient is still hospitalized - or as soon as possible.

The Bloodmobile makes 12 visits to DMAAC, the third Friday of every month. In Missouri anyone 17 through 65 years of age may donate. Seventeen year olds must present a written statement of consent from a parent, guardian or spouse. In Illinois statutes exclude 17 year olds as blood donors. When reaching age 66, a donor must have in writing, his doctor's permission written within two weeks prior to his donation.

It takes only seven minutes for the actual donation; 45 minutes for the entire procedure of registration; an examination consisting of temperature, blood pressure, pulse, and a brief

pints of blood, the small loss, usually less than a pint, is easily afforded. The body replaces the liquid part of the blood immediately — cells and minerals within ten days or two weeks. The energy loss might be compared to the exertion required for a brisk half-mile walk. The average person may donate every eight weeks, but not more than five times a year.

There are no diet restrictions prior to donation except avoidance of excess fat (cream, butter, fat meat, etc.). Do not skip meals prior to donation.

Because of the high standard of donor criteria required for securing productive units, a certain group of individuals is excluded from being donors. This includes persons who have

- epilepsy
- weigh less than 110 pounds
- a history of heart disease or have had open heart surgery
- have or have ever had hepatitis or yellow jaundice
- had diabetes and are using insulin
- are pregnant, and not until six months afterwards.

Blood can also be given at the Missouri-Illinois Regional Red Cross Blood Center, 4050 Lindell Blvd., St. Louis, Missouri 63108, telephone 658-2107.

The active blood donation program means that some day, when you or a family member needs blood, that precious fluid will be available to meet your emergency. **GIVE BLOOD — THE GIFT THAT KEEPS ON LIVING!**

Career Book Closes For Librarians Johnson and Guenther

If you checked the card index file at the Technical Library you would probably find a card which read:

Title: Center Story

Authors: Johnson & Guenther

Category: Non-fiction

If there is no card, there should be for the authors, librarians Helen Johnson and Charles Guenther, are among the original group of employees hired in 1943 by DMAAC's predecessor, the Aeronautical Chart Plant. Helen began her career in March 1943 and Charles in April but in 1975 they are reversing the order as both close the book on their Federal careers, Charles retiring in April and Helen due to depart this month.

Charles Guenther, who retired as chief of the Research Department Technical Library, actually began his Federal service on New Year's day 1942 as a claims clerk with the U. S. Employment Service. He later worked at the Corps of Engineers until April 1943 when he transferred to the Aeronautical Chart Plant at the Illinois Terminal Bldg., 12th and Delmar. He was assigned to the Research Library Section and headed the Research Unit as a library assistant until 1943. Throughout his career with the Center, he has served as a librarian, translator, geographer, supervisory cartographer and supervisory librarian. While working with the Production Section (now Cartography Department) he set up the first historical files and proof files.

In 1948 he became the Center's first translator, translating Notams and geographical

documents for the what is now the Aeronautical Information Department. As an additional duty, from 1948 to 1955 he served as the first civilian historian, compiling and writing histories of ACIC and its overseas units.

Since 1957 Guenther has served as chief of the Technical Library, which has grown from a small collection of a hundred or so volumes in 1943 to its present size of about 85,000 items, including microfiche and audio-visual materials.

In 1971 he received the Center's nomination for the Air Force-wide award of Outstanding Executive Support Officer and in 1972 was named as the Center Civilian Employee of the Year in the managerial category.

While Guenther's Federal career has been significant, his accomplishments in his personal life have contributed greatly to the

Guenther

arts and culture of the world. Charles Guenther is an eminent poet and translator of foreign verse recognized throughout the world. His book, *Phrase/Paraphrase*, published in 1970, was nominated for a Pulitzer Prize in letters and the American Library Association Notable Books list in 1971.

Most recently he was named to the editorial advisory board of the National Library Literary Review.

In 1974 he won the James Joyce Award from the Poetry Society of America for his poem, "Missouri Woods."

One of his highest honors came in 1973 when he was awarded Italy's highest governmental decoration, "The Order of Merit," for his translations of modern

Italian poetry. He has published three books of Italian poetry translations.

In 1963 he collaborated with several translators in a volume of Selected Poems by the French Poet, Alain Bosquet. Five new, unpublished translations by Guenther of M. Bosquet's poems will appear in the inaugural issue of National Library Literary Review, spring 1975.

The lists of credits and areas of active interest within the Arts and Culture community for Charles Guenther reads like a listing in Who's Who, a publication, by the way, in which you'll find Charles Guenther listed.

For Helen Johnson, the other original librarian, her career has not been without its great accomplishments either. She was among the first to enter on duty with the Chart Plant in March 1943 at the Illinois Terminal Building. Hired for the Research Library, she was assigned as the Plant's first Map Unit supervisor.

As a supervisor she was responsible for processing and cataloging the entire map collection which was used as primary source material in compiling, drafting and editing aeronautical charts for the U. S. Army/Air Forces. She departed government work in April 1945 as chief civilian of the Library.

Working in private industry she acquired additional professional

library experience before returning to the Center in 1958. Rehired as a librarian she has been in charge of cataloging all scientific/technical books and

Mrs. Johnson

reports acquired by the Technical Library. As Helen phrases it, "in 16 1/2 years that comes to a lot of books cataloged."

One of her major challenges came from 1958 to 1962 when she had to recatalog half of the then-existing Technical Library collection—thousands of volumes—from the Library of Congress system to the Dewey Decimal system.

When asked about retirement plans Mrs. Johnson said, "As for my immediate retirement plans, I am looking forward to a visit from our daughter, her husband and children who live in France. After that, I shall probably do some volunteer work and pursue various hobbies. Being just a housewife is going to satisfy me for awhile at least."

Famous Speech by Firebrand Helped Spark the Revolution

Redheaded, rawboned Patrick Henry captivated audiences with the National Geographic Society says

Yet the pine pews where Washington, Jefferson, and Henry sat

DoD Active Duty Strengths

Assistant Secretary of Defense (Manpower and Reserve Affairs) William K. Brehm has announced that the total strength of the military services at the end of January 1975 was 2,143,000 or 99.9—per cent of their January target of 2,144,000. Strengths by service are compared with their June 1975 objectives as shown in the fiscal year 1976 budget request in the table below:

Active Military Strength
(in thousands)

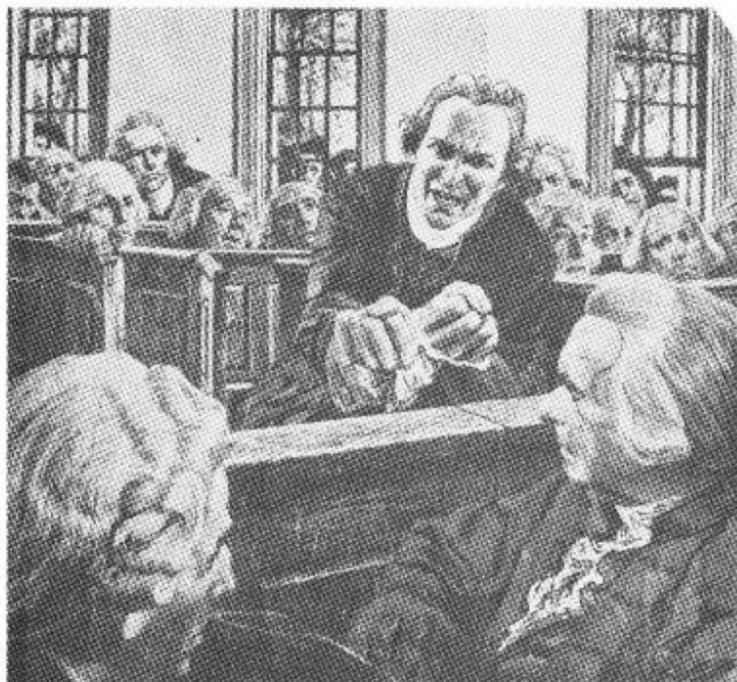

January 1975 June 1975

Henry captivated audiences with oratory so powerful that even his pauses sent chills up and down spines.

His masterpiece undoubtedly was the "Give me liberty or death" speech delivered 200 years ago on March 23, 1775 in Richmond, Virginia, at Henrico Parish Church,

says.

Built on what had been a choice hill in the city, the original plain wooden building—now called St. John's Episcopal Church—is part of a larger structure. Money for upkeep has been scarce, and a cluster of antiquities has grown up from efforts to attract tourists.

"OUR CHAINS are forged," thunders Patrick Henry in his famous "Give me liberty or death" speech to Virginia delegates in March 1775: "There is no retreat but in submission and slavery." The volcanic orator from the backcountry helped convince less emotional Virginians such as Washington and Jefferson, in background, to defy the armed might of Great Britain.

ington, Jefferson, and Henry sat are there, and so is some of the same pine flooring from which Henry delivered the words that are among the best remembered in the American tradition.

Dispatches about increasing British restraints on Boston were reaching Virginia, and Henry made up his mind that it was high time for bold action, whatever the consequences. He decided to go for broke in his speech before Virginia delegates who defiantly assembled at the church after the House of Burgesses had been dissolved at Williamsburg.

Standing in a pew three rows from the pulpit, Henry, according to eyewitness accounts, "commenced somewhat calmly, but the smothered excitement began more and more to play upon his features and thrill in the tones of his voice. The tendons of his neck stood out white and rigid like whipcords.

"His voice rose louder and louder, until the walls of the building . . . seemed to shake and rock. . . . Men leaned forward in their seats, with their heads strained forward, their faces pale. . . ."

Acted Like Slave

Approaching the end, Henry stepped from the pew to the aisle, paused a long few seconds, turned slowly toward a group of conservative delegates. He "stood in the attitude of a condemned galley slave. . . . His form was bowed; his wrists crossed; his manacles

Army
Navy
Marine Corps
Air Force
Total DOD

	January 1975	June 1975
	(Preliminary)	(Objective)
Army	778	785
Navy	547	536
Marine Corps	195	196
Air Force	623	612
Total DOD	2,143	2,129

Mr. Brehm also announced that the total of 31,500 men and women recruited in February was 101 per cent of the total objective of 31,100:

Enlisted Accessions (All Sources)

Service

Army
Navy
Marine Corps
Air Force
Total Department of
Defense

	February 1975		
	Objective	Actual	Per Cent
Army	14,500	14,500	100
Navy	5,800	5,900	102
Marine Corps	4,800	5,000	104
Air Force	6,100	6,100	100
Total Department of Defense	31,100	31,500	101

were almost visible." His words were a low rumble.

"It is vain to extenuate the matter. Gentlemen may cry peace, peace, but there is no peace. . . . The next gale that sweeps from the north will bring to our ears the clash of resounding arms. Our brethren are already in the field. Why stand we here idle? What is it that gentlemen wish? What would they have?

"Is life so dear, or peace so sweet, as to be purchased at the price of chains and slavery?" Then the slave demeanor was gone. Patrick Henry stood "erect," "defiant," "radiant," his arms stretched far upward, the ring of his voice like a "Spartan paean."

"Forbid it, Almighty God! I know not what course others may take, but as for me, give me liberty, or give me death!"

Mr. Brehm stated that 97 per cent of all nonprior service enlistees were in mental categories 1-111 which are the average and above average mental groups. The February proportion was about equal to that of January and reflects a continuation of the favorable recruiting climate that has existed in recent months. Of the new enlistees, 72 per cent were high school graduates, and 9 per cent or 2,700 were women. Black enlistments accounted for about 15 per cent of the February enlistments. The services also recruited about 3,400 prior-service personnel.

DO THIS FIRST

- CALL A PHYSICIAN—IMMEDIATELY!
- Keep the patient warm.
- Determine if the patient has taken:
 - (1) A POISON
 - (2) AN OVERDOSE
- While waiting for physician, give appropriate counterdose below.
- But do not force any liquids on the patient — if he is unconscious.
- And do not induce vomiting if patient is having convulsions, or if patient is unconscious.

To Find The Correct Counterdose
 • In one of the tabs printed at left, find substance causing the trouble.
 • Next to that substance is a number. This refers to counterdose bearing same number in the sections below.

Keep All Poisons And Medicines Out Of Reach Of Children!

(Editors Note: This chart could be helpful if someone in your home takes a poison or overdose of drugs. Save this chart and keep it handy. It will tell you what to do if you have a emergency involving one of these poisons or drugs.)

analyzing archeological sites will also be discussed. More details regarding the meeting time and price can be found on publicity posters placed throughout the Center.

In Sympathy

Sympathy is extended to Bill Guinn, PDDS and his family in the loss of their son Steven J. Guinn, aviation mechanic jet 3rd Class, United States Navy. Steven was killed in an automobile accident near Lemoore Naval Air Station, Calif. where he was stationed.

Interment was in Sacred Heart Cemetery, Florissant, Mo.

Second In Class Rank

Marty Montgomery, son of Jack Montgomery, GSS, has been named salutatorian at the Herculaneum High School.

He has carried a heavy academic program concentrating in math and science. He is listed in Who's Who among American High School Students and is a member of the National Honor Society.

He plans to attend Southeast Missouri State University.

His father recently transferred from the Directorate of Logistics/DMAAC St. Louis to the Geodetic Survey Squadron in Wyoming.
