

National Prayer Breakfast Has Packed House

A capacity crowd attended the 2nd annual National Prayer Breakfast observance held at the Aerospace Center on February 2nd.

The non-denominational services reflected the theme of the nation's strength through religious freedoms.

In addressing the gathering, Aerospace Center Director, Col. James St. Clair, spoke of the tradition of the National Prayer Breakfast established with the Eisenhower administration. "Here at the Aerospace Center," said the Colonel, "we join other Americans throughout the world in bowing our heads and lifting our hearts as we ask God to guide and direct our national leaders and as we rededicate ourselves to the moral and spiritual values on which our nation was founded."

Assisting in the program was Rev. Floyd Morris, Maurice Yahl, Rev. Benjamin Johnson and William Hesselden.

The prayer breakfast was held in the Center's dining hall.

DoD Budget: 50% 'People Costs'

The defense budget request, which has been sent to Congress, is for \$126 billion in total obligation authority (TOA) and includes the slightly more than \$115 billion for programmed outlays in FY 1979, according to briefing information from Secretary of Defense Harold Brown. The difference between TOA and outlays allows the Pentagon to make long range programs like aircraft and shipbuilding.

Brown said this is "an austere but adequate defense budget, which maintains and improves a strong national defense posture."

Most of the budget briefing was devoted to weapons systems and programs.

this—maintain a program of benefits for our men and women that recognizes, particularly in military life, the dislocations, the family separations, and the personal risks inherent in the profession."

Personnel-related costs are the single largest component of defense spending, according to the administration budget documents.

That means that about \$57 billion of the planned \$115.2 billion defense spending in the new fiscal year beginning October 1 would go to pay civilian and military personnel, family housing, and retirees.

Nearly \$29 billion of that amount is allocated for military personnel and \$10.2 billion is for retired pay.

EPA Begins Studies At Center Installations

"Take a deep breath and blow"—For those that have already undergone the Environmental Protection Agency pulmonary tests that phrase is common.

The testing team has partially tested employees at 2nd Street and was in the process of completing tests on South Annex employees at Orienteer deadline. It was anticipated that the team would return to 2nd Street this past week to complete the testing at that installation.

The tests are part of a three part study being conducted by the Environmental Protection Agency

to identify the possible effects of environmental factors on the health of Aerospace Center employees.

The first part of the studies was the completion of a health questionnaire by volunteer employees at both installations. This was followed by the actual pulmonary testing. The third study will involve about twenty persons who are now working at the South Annex that will be selected for daily pulmonary tests for about eight weeks.

Mobile units have been established at both installations to administer the pulmonary tests.

New BAG Officers

The Black Awareness Group (BAG) associated with the Aerospace Center has elected new officers for the 1978 year.

Louis Foster, ACAD, was named president; Robert Franklin, ACMBE, vice president; and Lonzell Williams, ACAD as the secretary-treasurer.

Foster appointed a membership chairman, Robert Foster; Public

Relations chairman—Ferdinand Buffington and Program Activities chairman—Floyd Morris.

BAG is now incorporated as a non-profit organization.

Their membership drive for the new year has already begun. The next meeting is scheduled for February 22nd in the 5th floor conference room at 3:00 p.m.

programs.

However, Brown stressed the point that "none of these systems or programs will work without our people. The men and women of the Defense Department, military and civilian, are the foundation of our strength, a foundation that we must keep firm."

Brown said that personnel costs continue to take more than 50 percent of the defense budget.

"Understandably, we must be efficient in the use of this, our most precious resource," Brown said.

"At the same time," Brown added, "we must—and I'm personally committed to

is allocated for military personnel and \$10.2 billion is for retired pay.

Approximately 43,000 more annuitants are expected on the military retired rolls during the fiscal year, bringing the total number of retirees in FY 79 to about 1.2 million.

There is a slight decline in defense manpower costs over previous years because of planned personnel cuts in FY 79, the defense officials said.

Secretary Brown said that total obligation authority for military personnel will decline by about one percent or \$20 million.

Brown said the decline is a result of a reduction in active duty

Body English Didn't

Bring Strike for Miller

All the body English in the world wasn't enough for Bill Miller, ACA, on February 8th as he bowled for a strike on the local television show "Bowling for Dollars."

Despite four strikes in the practice frames the shot that counted under the lights turned out to be an eight pin hit. He then

spared the two and rolled a bonus shot which left one pin.

His first roll for the jackpot would have been worth \$420 had they all gone down.

Bill was the sixth contestant on the program which is seen locally on Channel 2.

ACSM Mini Meet

The ACSM Mini Meeting will be on Tuesday, February 21 in the Dining Hall from 3:15 to 5:15 p.m.

Speaker will be Gene Neihouse, Director of Engineering, Peabody Coal Company, speaking on "Coal, Geology, Mapping & Mining."

A social from 3:15 to 4:30 will precede the speaker. Meeting will last until 5:15. The cost is \$2.00 per person, with drinks available at nominal cost. See posters for ticket sellers.

stallment basis," Brown said.

Civilian Welfare Fund 1978 Council

The DMAAC Civilian Welfare Council met on January 26 and elected Norbert Kellner as Chairman and Auda Adler as Recorder for 1978.

The complete roster of council members and alternates is:

Area 1

(D, AA, CO, PA, PR, PP, SO, SS, ST)

Auda Adler, PPIP, 4406

Alt. Rose Messinger, PPC, 4615

Neil VanDermeulen, GDCCB, 4773

Connie Murphy, GDDD, 4117

Alt. Ruby Harris, GDDD, 4117

Custodian of Funds is Kathy

James; Custodian of Equipment;

Edward Buschart and Joan Langevin, and Parliamentarian is John Rau.

The following committee appointments were made:

Research Committee: Elizabeth Wissman, Dorothie Lewis, William Sypniewski, Eileen Sinnwell.

Social & Welfare Committee: Judy Fizer, Donald Vail.

Budget Committee: Connie Murphy, Neil VanDermeulen, Rudy Aguilar.

First of New Fuel Tanks Placed

The "wide load" sign on the crane is almost an understatement when discussing the first of our 30,000 gallon fuel tanks being placed at the Aerospace Center. The new tanks were necessary to accommodate the new wing addition heating system and to upgrade the present storage facilities for the 2nd street complex. Workmen braved the zero degree weather of early February to position the tanks into the specially excavated cavity on the parade ground.

Bits And Pieces

From the Black book:

Glory Be, this is a three day weekend and boy do I need it. After a round with the flu for the entire family and a stack of work piling up on my desk the three days look mighty good. Now if I could only find some way of getting an all expense paid trip to a warm southern climate I'd be all set. In lieu of the trip South I suppose the Washington Birthday weekend will be spent as usual—doing my income tax.

—0—

I like the way IRS has started every form for the last few years, "This form has been simplified to make it easier for the taxpayer to file." Then you read on a little further on this year's form and it says if Congress hasn't done anything on the energy tax disregard line so and so but if they have then watch or listen to the news media to find out how to fill in the line. Oh, boy! Just once I'd like to see a line that said, "If you figure out how this form works deduct all your tax here."

—0—

A couple of issues back we ran the photo of the excavation on the parade ground and then readers submitted captions, (humorous ones). The folks at the Topographic Center Public Affairs Office have picked-up on the idea (they usually steal most of our good ones) and asked for the picture so that their readers might try their hand at captions. When the paper comes out we'll try to pass them along to

Odell R. Courtaway, \$245.00; Harley E. Jennings, \$25.00.

Patrolman of Month

pisces

February 19 - March 20

The sensitive, intuitive sympathetic Piscean is often an artistic, impractical dreamer who ignores the facts of reality and spends to excess. Yet you know instinctively that money should not be a source of worry. Save before you spend with U.S. Savings Bonds through Payroll Savings.

NFFE Seeks Delegates

NFFE Local 1827 will conduct nominations for delegates to the national convention at the regular general membership meeting on February 28. This meeting will be held at 4:00 p.m. in Bldg. 4, South Annex.

The national convention will be held in Tucson, Ariz. during September.

Gilbert W. Downing has been a consistently outstanding performer with DMAAC earning the Security Policeman of the month award for January, according to officials. He was signaled out by Security Supervisory personnel as Security Policeman for the second time.

He retired from the U.S. Army after serving from September 1943 until March 1964, and has been at the Center since 1966.

readers might try their hand at captions. When the paper comes out we'll try to pass them along to you.

dlb..

In Sympathy

Gerard A. Hoeflich, ADDPD, died on Monday, February 6th. He was an air information specialist and had been at the Center since October 1959.

Services were held on February 8 from Kriegshauser West with graveside services at Hiram Cemetery.

He is survived by his wife Dorothe and a daughter Phyllis.

Recent Retirements Include Several From KCO

THOMAS L. BEARD, ACK, retired on January 6 with 27 years, 9 months total Federal service. He served with the Navy Sea Bees as a Fireman 1st Class. His work included electric highline construction and boilerman on Midway Island during WW II.

He was a draftsman/editor, member of Production Management staff for the Army Map Service, and editor and later a project leader for DMA, and a cartographer for DMAAC since September 1977.

He is going to follow his career as an artist. "I'm taking an early out because to advance and grow in the field of fine art a commitment of 100% is now required," said Beard.

He has produced many oils, watercolors, and drawings on subjects about American wildlife, nature, history and the Old West, which have won him many awards.

His other art activities include teaching, lectures, critiques, demonstrations and judging group art exhibits.

His paintings are in various private and commercial collections, coast to coast, Canada and Europe.

IDA M. COOPER, ACK, retired on January 6 with 26 years Federal service.

She began her Federal career in 1948 with the Internal Revenue

Service as a secretary in the Sort and Match Section. Two years later she transferred to the Bureau of Disbursement as a payroll typist and in 1953 she joined the Army Map Service. She was assigned as a cartographic technician at the Kansas City Office at time of retirement.

"I plan to go into bookkeeping and accounting for small businesses," said Mrs. Cooper.

ROBERT J. PULLEY, ACK, retired effective January 6 with 25 years, 5 months total Federal service.

He started work with the Army Map Service in July 1952 as a draftsman and had worked most of his years in Triangulation. He was assigned as a senior cartographer at time of retirement.

"In retirement hope to work in construction and also a greenhouse," Pulley said.

OLIVIA CRIHAN, ACCBD, retired on January 14, lacking one month for 22 years total Federal service, all with this Center.

Her employment years began in 1942 as a teacher in a Romanian high school for girls where she taught geography. She and her husband came to Washington, D.C. in 1946 when her husband was appointed the First Secretary of the Romanian Embassy. She and her husband asked for and were

granted political asylum in 1948 when he resigned his position at the Embassy.

She began her Federal service with the Aerospace Center at Detachment 1 in Washington in 1956 in the Geographic Names Section and came to St. Louis in 1957 with the Research Department. She has continued employment as a geographic names specialist and was assigned to the Aerospace Cartography Department at time of retirement.

"After retiring, we plan to visit Florida and California to decide which we like best, in order to get away from St. Louis winters," said Ms. Crihan.

"Although I enjoyed my work tremendously, I have some advice for married women: If you can afford to stay home and don't—you should have your head examined! Of course I'm kidding," she quickly added.

ROY J. ERSON, ACIBC, retired effective January 27 with 20 1/2 years Federal service.

He began employment as a forester with CCC Camps in Northern Minnesota, in charge of timber cruising, cover mapping, tree planting, etc. He was later in the employ of Resettlement Administration and Soil Conservation Service in Wisconsin.

He was drafted into the Army in

January Promotions

The following people received promotions during the month of January: Preston Cage, GS-11; James E. Bundy, GS-11; Vernon Charleston, GS-11; John F. Clouser, WP-22; Allan J. Feager, GS-11; Roger L. Henke, GS-7; George O. Jones, GS-11; Susan C.

1942 and assigned to Infantry and Field Artillery but in 1943 he received a commission in Chemical Warfare. He served in the European Theater of Operation receiving his discharge in 1946.

He was in business in the lumber and building material field until January 1963 when he returned to Federal service at the Center. He was assigned to Missile then Cartography Departments and at time of retirement was assigned to DLMS as a cartographer.

"My wife, Betty, and I look forward to traveling, seeing our grandchildren and playing lots of golf," said Erson.

DOROTHY V. MADDOX, ACK, retired on January 6 lacking one month of 21 years total Federal service.

She worked for the Corps of Engineers, Kansas City Office, prior to joining Army Map Service in February 1954. She was assigned as a cartographic technician in the Kansas City Office at time of retirement.

She said she had no retirement plans at this time.

Layton, GS-5; Mary Louise T. Maret, GS-5; Randy Martinez, GS-5; Jacquelyn M. Parks, GS-11; Melvin G. Prysock, GS-11; James L. Smith, WP-18; Christine L. Truka, GS-5; Donald W. White, WP-18; Albert J. Wiegel, GS-11; Mary A. Brann, GS-5; John G. Broleman, GS-11; John S. Defato, GS-11; Dorothy M. Hyde, GS-12; Linda F. Patterson, GS-6; Edward T. Tsugita, GS-11; Phyllis L. Benson, GS-9; John L. Davis, GS-4; Odee A. Davis, GS-9; Gilbert L. Druen, GS-11; Charles P. Fischer, WG-10; Larry L. Jensen, GS-11; James E. Johnson, GS-13; Ruth C. Kath, GS-7; Frances D. Lavin, GS-11; John C. Maya, GS-11; Ruth A. Phillips, GS-9; Dawn Schoenberg, GS-4; Thomas B. Sellers, GS-9; Sandra D. Terrill, GS-4.

Photo Ident Correction

The last issue of the Orientor carried a photo and story on the installation of a new scientific computer. Vernon Charleston was identified as being the console operator in the picture. The caption should have identified Berk Bigler as the operator of the console instead of Charleston.

—From the 1978 Black History Month Kit, Association for the Study of Afro-American Life and History.

AFRO-AMERICAN HISTORY

“Roots, Achievements, and Projections” is the theme of Afro-American (Black) History Month, celebrated nationwide by Presidential Proclamation during February 1978.

This year's theme and observance centers on the origins, accomplishments, and on-going contributions of black Americans. Various activities highlighting past and present Afro-American leaders and events are being held at military installations during the month-long observance.

In 1915, history scholar Carter G. Woodson founded the Association for the Study of Afro-American Life and History, and in 1926 he spearheaded the first national black history observance. Both the organization and the observance have a two-fold objective:

- Stimulating pride among black Americans in their African and American heritage; and
- Increasing among all Americans recognition, understanding and appreciation of the contributions of Afro-Americans to our

society and Nation.

Through 1975, the yearly black history observance was a week-long event in February, including the birth dates of Abraham Lincoln, Feb. 12, and Frederick Douglass, Feb. 14. Then in 1976, during the 50th black history observance and the U.S. Bicentennial, Black History Week was extended for the entire month of February.

Designating a month-long observance has continued, says the Afro-American Association, because of the demand from thousands of persons who feel that much still needs to be done in the process of teaching and learning about Afro-American contributions. The ultimate goal is placing black history properly in all books and other media throughout the year.

Additional information on black history studies and nationwide projects is available from the Association for the Study of Afro-American Life and History, Inc., 1401 14th Street, N.W., Washington, D.C. 20005.

The Auditors Are Coming!

by David L. Black

Many a corporate executive, commercial businessman, and even individual tax payer has spent restless nights and several nervous days as the result of someone saying—"The Auditors Are Coming."

In the case of the Aerospace Center the auditors are already here but the sleepless nights and nervous days are a thing of the past as new concepts in auditing approach stress customer service.

Today's auditor doesn't wear the traditional black suit; carry a lie detector in every pocket; or examine bookkeepers under hot lights. In fact, picking the auditors from the rest of the work force might be rather hard to do.

For the Aerospace Center the auditors are a group from the Defense Audit Service, the only authorized internal audit for the defense agencies. Defense Audit Service, or DAS, is charged with providing the Secretary of Defense with an independent, "corporate" audit staff capable of accomplishing complex audits within the DoD.

Basically they are responsible audits for top-level DoD for the interservice audits of all managers; the security assistance DoD Components; quick-response program worldwide, including

foreign military sales; and continuing audit responsibilities for the defense agencies, among them the Defense Mapping Agency.

"We consider ourselves an integral part of the management system," said Donald Reed, senior auditor with the project teams at the Aerospace Center.

In emphasizing the modern audit approach Reed said, "Because we are an independent audit group we can address our recommendations to any level of management. For example, there are times when problems arise at the local level which are caused by compliance with a higher level directive or the absence of adequate higher level guidance. We can recommend appropriate changes directly to the highest level within the Department of Defense."

Using the motto, "serving management," the audit teams solicit, (during their initial interviews with top agency management), problem areas that the agency feels should be addressed. Frequently these are problems which the agency recognizes but does not have the resources to examine and resolve. The DAS provides the needed service.

While at the Aerospace Center

Part of the audit team assigned to the Aerospace Center go over the day's plans in a briefing session. From left to right: Donald Reed, Dick Dziarnowski, Charlie Aten and Mary Boyer.

looking into the five non-appropriated funds of the Center.

Their examination of the records has taken them to the Kansas City Office, DMA Headquarters and the two major DMA components in the D.C. area.

Although the audit so far at the Aerospace Center has dealt with the Accounting and Finance Office, the auditors were quick to point out that the audit service is in no way limited to that area. In fact, less than 25% of the audits are in the finance and accounting areas. Most audits deal with management actions as they apply to efficient and effective operation.

The current audits, some of which were requested by DMA, are in their final stages and should be completed within the near future.

Recommendations and findings from the audit will be provided to the Director and to DMA headquarters.

"We have found the people here at all levels of management to be most cooperative," said Reed. "Because of this cooperation and openness we feel we have been able to provide assistance to the Center management in the areas that we

Black History Quiz

The 1978 Black History Month theme of "Roots, Achievements and Projections," provides a splendid opportunity to review contributions Blacks have made to the nation.

Questions

1. Who was the first Black to serve in the astronaut program?
2. What Black man was involved in the planning of the city of Washington, D.C.?
3. Who was the first Black recipient of a Nobel Peace Prize?
4. Who was the founder of Tuskegee Institute?
5. Who was the first Black Supreme Court justice?
6. What was the nickname given to early Black cavalry units?
7. What Black man performed the first successful surgery on the human heart?

Answers

1. Maj. Robert H. Lawrence. Major Lawrence was one of four Air Force pilots selected in 1967 for the manned orbiting laboratory program. He was killed in an aircraft accident Dec. 8, 1967.
2. Benjamin Banneker.

Defense Audit Service auditor, Dick Dziarnowski, (center) discusses accounting data with David Nugent and Connie Geldmacher of the Aerospace Finance and Accounting Office. The auditors have been at the Center since October of last year and are approaching the final stage of their audit.

Missile Test Underway

A series of cruise missile survivability tests are underway to find out, by flight testing, the specific circumstances under which the missile is vulnerable to air defense systems.

First tests will involve only radar acquisition and tracking to obtain data for further testing that will involve actual firing.

The Air Force Tomahawk cruise missile will be used to "fly past" an air defense site where system components will track the missile on radar. Navy's Tomahawk cruise missile launched from submarine tubes has not been scheduled for testing.

The Pentagon has ordered the cruise missile tests to measure performance and to see if design refinements are necessary.

First Aid Training Pays Off

First aid training taken at the Aerospace Center recently paid dividends for Judy Horn of SDDLs. When a large piece of candy lodged in the throat of her seven year old boy she was able to prevent his choking to death by using the Heimlich maneuver learned in the first aid class.

The techniques were demonstrated in a training film on the subject.

CROSSWORD 2

the auditors have been examining the DMA Centralized Payroll, which is handled by the Center's Finance and Accounting Office; as part of the DoD-wide audit they have reviewed the administrative control of funds; and are now

management in the areas that we have examined."

The restless nights and nervous days are gone. Today's auditor is there to help and to protect the taxpayer's dollar (our dollar) just like the rest of us.
