DEFENSE MAPPING AGENCY AEROSPACE CENTER

Vol. XXVIII, No. 22

October 30, 1987

"Sir, I assume command"—with these words and a salute to the Vice Chairman of the Joint Chiefs of Staff, Gen. Robert T. Herres (left), Maj. Gen. Robert F. Durkin becomes Director of the Defense Mapping Agency. In the background is Maj. Gen. Robert A. Rosenberg, retiring DMA Director.

Maj. Gen. Durkin Takes Command

The new director "passed the word" up front as he assumed command of the Defense Mapping Agency.

Relieving the retiring Maj. Gen. Robert A. Rosenberg, Air Force Maj. Gen. Robert F. Durkin told the several hundred assembled for the

collectively face to make this support more timely and more tailored — and I'm here to tell you that I willingly, eagerly accept those challenges."

The colorful military ceremony was held at the DMA Hydrographic/Topographic Center in

Though we've progressed from parchment scrolls to optical discs, and from quill pens to digital input devices, the needs remain the same.

"These tools don't get the job done by themselves. The skilled cartographers, the geographers and other specialists in dozens of technical

Construction Projects Start At 2nd Street, South Annex

Work was scheduled to begin Oct. 26 on renovation of the west dock of Building 36, which will be enclosed as a break area for employees. The project is one of three construction projects that will affect employee parking at 3200 South 2nd St. during the next several months. (See accompanying article.)

A total of 15 construction contracts are scheduled for completion during this time, 10 at 3200 South 2nd St. and five at 8900 South Broadway.

The west-dock renovation will include a four-foot high brick wall that will line the outer edge of the present dock for its entire 270-foot length. Glass windows, six feet in height, will connect the brick wall to a band of simulated limestone extending four feet below the canopy roof. New lighting and heating, ventilation and air conditioning are part of the project, which is scheduled for completion next February.

Parking spaces along the west dock will be moved back eight feet during construction but only the minimum number of spaces needed to accommodate the day's construction will be blocked off. "Some phases of the construction will involve all of the parking along the dock, but other phases will affect only a few spaces or none at all," said Cal Hunnius, chief of the Construction Management Branch (FEEC).

All of the reserved spaces along the dock have been moved back to the fourth row in A-Lot, spaces A-

fence and replacing the chain-link fabric and barbed wire; in the second stage, the stone wall will be tuckpointed and stones will be replaced, as necessary. Completion at both 2nd Street and South Broadway is scheduled for early next year.

The third project to impact parking at 2nd Street is the installation of a fire-alarm sprinkler system in Building 37. The project, which begins next week, will impact parking along the north side of the building, where excavation will be necessary to

Continued on page 4.

Parking Affected By Construction

The new fiscal year has brought three construction projects that will affect employee parking at 3200 South 2nd St. (See accompanying article.)

A coordinated effort between SO and FE, the Directorates of Security and Facilities Engineering, will keep us informed on current construction activities, with the placing of updates in the DMAAC Bulletin, fliers and the marquee in Building 36.

To help relieve some of the stress involved with parking, SO is 1) recommending increased use of car pools for the next six to eight months, 2) minimizing contractor vehicle registration, 3) working with FE and contractors to

change of command. The ceremony has become important additions to my vocabulary the past few years. Those words are 'timely' and 'tailored' — particularly as those words apply to support to the Unified and Specified Commands and their combatant components.

"Support which is not tailored is inefficient support, and support which is not timely is no support at all," he maintained. The new director added: "You'll hear those words repeated time and time again."

General Durkin noted, "I am well aware of the challenges that we

face. The DMA is a difficult challenge "is the difficult one of following in the footsteps of General Rosenberg. He has brought DMA to new heights in supporting the soldier, the sailor, the airman and the Marine, who daily place their lives, literally, in the hands of the 9,500 people of DMA.

"DMA's reputation for accuracy and precision is the envy of the world," General Durkin declared. "The complex demands of a complex age are reflected in the technology which DMA today relies upon to serve its consumers.

expeditors, clerical, service specialists and many, many more are what make DMA work."

The Vice Chairman of the Joint Chiefs of Staff, General Robert T. Herres, who officiated at the Change-of-Command ceremonies, said he hoped "future Americans would learn to recognize this Agency's efforts and its achievements in this very early part of the Space Age — recognize with the awe past generations have had for such geodetic pioneers as Lewis and

Continued on page 4.

For the Last Time

An emotional moment comes during the DMA Change-of-Command ceremony as the personal colors of retiring Maj. Gen. Robert A. Rosenberg (right) are folded and furled for the last time. Joining General Rosenberg for the ceremony is the Vice Chairman of the Joint Chiefs of Staff, Gen. Robert T. Herres (left). Major Gen. Robert F. Durkin, the new DMA Director, is seated in the background.

New Phone Service in Personnel

The Directorate of Civilian Personnel (PO) will inaugurate a "Personnel Information Line" beginning Nov. 2.

The idea for the new telephone information service grew out of one of Colonel Lemon's Friday afternoon walks through the work areas, said PO Director Richard A. Vierling.

"The Director was talking with employees, and he found out that many of them didn't know who to contact in Personnel for answers to their questions. This led him to believe that we need a central point of information to assist people. It's another way of focusing on the individual."

The Information Line will be answered by a personnel staffing specialist, who will be the initial and sole point of contact to keep employees from making numerous calls to Personnel. If the specialist cannot answer the question, she will obtain the proper informa-

tion and advise the caller within 24 hours or refer the caller to the most knowledgeable source within PO. The dedicated Personnel Information Line phone number will be 4205.

"When employees don't understand some personnel matter, or if they're getting conflicting information, they can call this number and get the straight story," said Vierling. Employees should still address questions about a specific vacancy announcement to the staffing specialist named in the announcement, but for other, more general questions, in any area of Personnel, the Information Line will be available.

Personnel staffing specialist Jean Gockel has been assigned responsibility for the Information Line.

"We feel Jean is going to do an excellent job because she's seen the Center go through different developmental stages," said

142 to 1-100 during the construction. Car poolers will be able to park in any spaces that are available along the west dock. Contractors have been repairing the security fence around the perimeter of both the 2nd Street and South Broadway installations in two separate contracts. Parking is not involved at South Broadway, and at 2nd Street, only the number of spaces required for the day's work are being blocked.

The fence work is being completed in two stages at 2nd Street. The first stage, which is nearing completion, involved painting the

The next six to eight months will be crucial in maintaining our morale. All of us will be inconvenienced in some way, but patience will be a virtue. If you have any questions regarding construction that will affect parking, contact TSgt. Green/SOFA at 4942 or Mr. Hunnius/FEEC at 4109.
—TSgt. Mark Green
Physical Security Manager
Facility Security Division

Vierling. She will not be just a telephone operator to take messages but someone who has knowledge and will be empathetic to the concerns of the individual seeking information."

Ken Tucker, also a personnel staffing specialist, will serve as a backup when Jean is unavailable.

Director's Hotline

The Director's Hotline is available for employees who have questions or suggestions for improvements in all areas. Some suggestions/questions that are received will be printed in the Orientor, along with an answer. Call 3-4178 24 hours a day. An answering machine will take your call.

Rear Admiral O.E. Osborn
Deputy Director
Defense Mapping Agency

DMA Must Keep Up Pace

AFTER TWO YEARS of dynamic leadership by General Rosenberg, DMA now has a new director. On September 30, Major General Robert F. Durkin relieved General Rosenberg, who retired that same day.

Our agency is thus in a transitional period, a time that can be critical to our fast-moving programs unless we all consciously direct our attention to keeping up the pace.

General Durkin, a combat pilot with very significant background in R&D and the Intelligence Community, will need a period of briefings and orientation. While experienced in using DMA products in an operational environment, General Durkin must be brought up to speed rapidly on details of the many facets of DMA operations.

DURING THIS PERIOD, I call upon all managers and supervisors to keep ahead of the power curve. We are all aware of the dual strictures of budget reductions and the Defense Reorganization Act, plus the continuing pattern of increasing and ever more sophisticated requirements from all the operational commands.

While DMA has taken a number of steps to reassess requirements with our users, and to provide more generic products and data where practicable, the continuing "mismatch" between requirements and capabilities will be with us for some time to come.

At the same time, we are entering the transitional period of the Modernization Program. Major infusions of new equipment and techniques are underway, and extensive training of hundreds of personnel is mandatory. Ensuring a smooth transition, without a loss in our production rate, is a major challenge and will call for constant effort by all of us.

SO, IT'S A TIME when we simply cannot ease up. We must not lose the momentum that has kept this agency out in front, where operational military forces just may not function without our products and data.

It's a record that found General Durkin able to tell us at his Change of Command ceremonies: "The Defense Department and the American

Challenge Is Met In Kansas City

The Kansas City Field Office was challenged by an assignment that received the second highest priority in DMA. The assignment was to produce 28 cells for the Hydrographic/Topographic Center of level "1C" Digital Feature Analysis Data (DFAD) for a special test area.

DFAD cells consist of numerical representations of land features such as rivers, roads and population centers. DFAD is used to generate visual and radar data used in numerous aircraft trainers. Level 1C is a simplified form of DFAD that takes less time to produce than standard DFAD because it is generally based on chart manuscripts rather than photo analysis.

To produce a single DFAD cell, the Kansas City cartographers used from 400 to more than 2,000 feature analysis codes. The project was completed per schedule and express-mailed to HTC for digitizing.

KC's Aerospace Charting Division II (KCB), with the help of KCA, met the challenge.

Personnel involved in the project were Gerry Blood, Dave Bodfield, Steve Duros, Sue Engebretson, Chuck Forbes, Bruce Foster, Megan Gould, Merlin Gray, Jana Kanoy, Keith Krauterbluth, Liesa Manbeck, Denise Proctor, Tom Prout, Linda Oeser, Don Schmalbeck, Joyce Shannon, Dave Solomon, John Terryberry and Fran Washington.

Andregg Honored

Charles H. Andregg has been

Talking Point

Col. Robert J. Lemon, USAF
Director
DMA Aerospace Center

Combined Federal Campaign

I'm pleased to report that participation is running ahead of last year in the Combined Federal Campaign. With the rallies over, the participation rate was 45 percent, compared to 36 percent at the same time last year. But we still have a long way to go to match last year's final participation rate of 69 percent.

Now is the time to make your pledge if you haven't already done so. Our campaign goal is \$208,000, a slight increase over last year's goal, but we have fewer employees to reach that goal.

Our campaign managers and key workers have been working very hard to get the campaign rolling, as reflected in the participation rate so far. By your spirit of giving, many of you have shown that you are willing to do whatever you can to help those in need.

For those of you who have not given yet, I ask you to support this worthwhile cause, which is our only fund-raising event of the year. We have a job, and we have an obligation to help those less fortunate than us. Whether we get direct use of the agencies that receive our contributions is not as important as ensuring that these agencies are there for all of us, because we all do benefit directly or indirectly.

Give what you feel you can, but do give. I am proud of this Center's long tradition of helping those in need, and in the next issue of the *Orienter*, I hope we can report another campaign victory.

Suggestion Program

You have seen my words in this column before encouraging everyone to participate in the Suggestion Program as one of the tools available to help us improve productivity. In the third quarter of FY87, 22 suggestions at the Aerospace Center were adopted, which was the most in DMA.

For the first three quarters of FY87, 55 suggestions at the Aerospace

General Durkin also was able to say that he came here well aware that "the Agency's reputation for accuracy and precision is the envy of the world."

We must keep it that way. And prepare ourselves to fully support our new director in the challenging days that lie ahead.

DoD Cites Handicapped Program

For the fifth straight year, the Defense Mapping Agency has been cited by the Secretary of Defense for outstanding accomplishments in its affirmative action program for handicapped individuals. The Secretary of Defense Merit Award was presented during a ceremony at the Pentagon Oct. 6.

"We are extremely proud of this recognition," said DMA Director of

Personnel Curt Dierdorff. "To those whose contributions and accomplishments resulted in the DoD award, we extend our sincere appreciation.

"Let this award serve as an incentive to continue activities that promote the full integration and participation of disabled people in our workplace and in our society."

the American Society for Photogrammetry and Remote Sensing (ASPRS), the highest honor awarded to an ASPRS member. The award is presented for distinguished service to the Society, as well as distinction in the field of photogrammetry, remote sensing and related sciences.

As Deputy Director, Management and Technology, Andregg held the senior civilian position in the DMA when the agency was formed in 1972. He retired from DMA in 1979 but "continues to give his time and talents unstintingly to ASPRS," a spokesman for the Society said.

Honorary members of ASPRS are elected for life, with the total number never exceeding 21.

highest amount of benefits in DMA. The total amount of tangible benefits for all DMA components was \$543,958.

The outstanding results of the Aerospace Center also benefited our suggesters to the tune of \$13,443 for the first three quarters of FY87.

Obviously, many of you are asking the right questions: "Why is this job done the way it is? Is there a better, more efficient, way of doing it?" And many of you are sharing your ideas, to your benefit and DMA's.

Do you have a pet project that you would like to have evaluated? What is your proposal to improve productivity?

Keep those smart ideas coming in.

Azar: Suggestor of the Quarter

Laboratory, scientific and technical photographer Christopher S. Azar (SDRCC) has been honored as Suggestor of the Quarter for his suggestion to use a smaller film size to make contact film positives from negatives.

The filmstrip positives were almost three inches wider than the 6½-inch wide filmstrip negatives from which they were made. The band of unused film had been used for attaching friskets. Azar suggested using filmstrips of the same size for both positives and negatives. The friskets could be attached to the unused area between exposures or at the beginnings and ends of each strip, as needed, he pointed out.

The suggestion has resulted in a better product because of improved vacuum when contacting film of the

Chris Azar

same size, which has resulted in fewer reworks due to loss of contact. First-year savings will amount to \$24,199.48, officials estimate.

For his suggestion, Azar was awarded \$1,423.58, which was presented to him by AC Director Col. Robert J. Lemon.

Major Sabo Assigned as Chief of MCQ

Major Richard E. Sabo arrived Oct. 19 from Maxwell AFB, Ala., for assignment as chief of the Mapping and Charting Department Quality Assurance Office (MCQ).

A senior pilot, he earned his B.S. in mechanical engineering from the Air Force Academy and holds a M.S. in systems management. He is a native of Bonne Terre, Mo.

Two EEO Counselors Assigned Full Time

The Equal Employment Opportunity Office has announced that Karen Buehler and Ken Webb have been detailed as full-time counselors on assignments not to exceed one year. They were serving as part-time counselors.

According to EO Chief Gail Evans, the detailing of full-time counselors is intended to "improve our responsiveness to Aerospace Center employees and afford the opportunity to evaluate the full-time counselor concept before committing to permanent, authorized positions."

In the past, counseling had been conducted by a staff of part-time counselors selected from the DMAAC work force. Often, though, these counselors had experienced conflicts between primary job responsibilities and availability for counseling.

Girl Treated for Rare Disease

Four-year-old Katie Macinski, daughter of Ted Macinski (HSD) and his wife Chris, underwent a bone marrow transplant in August as treatment for an acute form of leukemia.

Doctors weren't sure if the operation would be successful, but Katie has been holding her own since that time, her father says. However, she will require home

medical care around the clock for up to two years.

To help the Macinski's with staggering medical bills and associated costs, friends have set up a trust fund in Katie's behalf. Persons who want to help may send a contribution to the Katie Macinski Trust Fund, Landmark Bank, 10 South Brentwood Blvd., Clayton, MO 63105.

MSgt. Walter Duncan, USAF, was promoted Aug. 1.
Capt. Dale L. Holzapfel, USAF, was promoted Oct. 13.

Enlisted Beat Officers, 9-6

A homerun by Sgt. Ricky Roberts in the fifth inning turned the tide in the enlisted vs. officers softball game at Lyon Park Oct. 8. The HR tied the game 5-5.

In the next inning, the enlisted personnel came back to score four more runs, while pitcher A1C Gregory Streetman held the officers to six runs, for a final score of 9-6.

The losing pitcher was Navy Captain Raoul Alvarez. At bat, Roberts, who scored the game's only homerun, was 3 for 3, backed by TSgt. Mark Green at 2 for 3.

The game was a re-match of a game played after last May's Fun Run, which the enlisted claimed to have won. "The officers disputed this and said they wanted a re-match, so we gave them one," said Roberts.

Bowling Report

At Western Lanes, high games/series for men were Dean Erpenbach 247/630, Greg Grohman 241, Earl Ross 236/624, Al Manson 233/648, and Vardyn Jones — 230.

Women high scorers were Sue Mateyka 244/653, Leslie Hoggatt 221/599, Pat Telefree 234/570, Janie Greathouse 216/606, and Janice Lindsey 216/597.

Rick Remmler bowled 65 pins over average with a 216 game, and Nancy Moss was 58 pins over average with a 204 game.

Sergeant Ricky Roberts scores a game-tying homerun in the officers-enlisted softball game in Lyon Park.

Looking Back

TEN YEARS AGO . . . The Parade Ground was the site of a large gathering Oct. 13 as members of the Cornelia Greene Chapter of the Daughters of the American Revolution dedicated the sundial as a national DAR landmark. The dedicatory address was delivered by Stuart Symington Jr., son of the former U.S. senator and a descendent of Captain Symington, who commanded the Arsenal in the early 1800s. The ceremonies, conducted by DAR Regent Gwendalynne Murphy, were covered by the local press and television. The sundial was placed on the Parade Ground in 1859.

TWENTY YEARS AGO . . . Widespread changes involving the characteristics and availability of source materials and corresponding changes in methods of collection and exploitation have dictated the need to reevaluate the role of Det. 1. The evaluation of current and future support required from Det. 1 concludes that the Washington Office will fulfill only those quick-response production and management-support requirements that cannot be satisfied by correspondence. By the end of fiscal year 1971, Det. 1's total strength is expected to be 58, or one-half the present authorized strength.

...Construction Projects

Continued from page 1.

connect the sprinkler system to an existing water main. The actual excavation will take place in an area that is now a flower bed. Parking spaces along the building should only be lost for about a week, officials estimate.

A project to modify the heating, ventilation and cooling system on the first floor of Building 36 on the west side of Section-A will not impact parking but it will impact personnel who use these areas. The project is scheduled to begin Dec. 1, with completion scheduled for the end of the month.

Areas involved include training rooms, the EEO Office, the Employee Assistance Office, and Administrative Communications. Contractors will proceed from room to room, spending about two days in each room. Work in the mail room and copy center will take place after the regular work day.

Renovation of the fourth floor of Building 36 in Section-B to accommodate offices of the Systems Center began in August. The project involves two areas, one scheduled for completion in late December and the other in February.

Other projects at 2nd Street that will not impact parking involve:

—an extension of the east wall of

Building 40, the utilities building, 13 feet to the east;

—an electrical project in Building 40 to supply emergency power;

—installation of a paper destructor on the south side of D-Wing;

—relocation of the chemical-mixing lab from the fourth floor to the basement of D-Wing;

—replacement of electrical switching in the basement of Building 36.

Work began Oct. 19 at 8900 South Broadway on a project to replace the overhead electrical power system with an underground system. The project will have minimal impact on parking; however, access to some buildings and to the installation will be affected at various times. Other projects at South Annex involve:

—the addition of 24 Feature-Extraction Segment work stations to 12 that were recently installed in Section 2B of Building 8900-4, with work scheduled for completion in February;

—installation of an incinerator on the south side of Building 8900-1; and

—modification of the air distribution system in Building 8900-2.

Honor Roll

At the newsbury games, highlights for women were Diane Harwell 211/552 and Sharon Doyle 223/538.

For the men, Tony Tyus 639/231, 212, Tom CorCoran 635/223, 223, Russ Anderson 614/224, 217, Bob Preston 604/253, 211, and Denny Dummeyer 602/223, 216.

—Ginny Woehrle

At DuBowl, Oct. 14, the high score for men was Dick Huffman 221, and the high score for women was Liz Krebs 210.

Officers are Marion Moehrle — president, Kelly Stohl — vice president, and Nancy Bender — secretary/treasurer.

—Kelly Stohl

...Change of Command

Continued from page 1.

Clark and Admiral Perry and others."

"Much of the work is not so glamorous" for those who have to do it, noted General Herres, "but then I suspect that when Lewis and Clark set off across the Missouri and down its western banks there were many times when they thought what they did was not all that glorious at the moment, either.

"Often the glory is perceived in the achievements as they are viewed from far downstream."

General Herres praised retiring

director Rosenberg as "a pioneer in the military space program," noting that "together, we laid the foundation for creation of the United States Space Command."

General Herres presented General Rosenberg with the first oak leaf cluster to the Defense Distinguished Service Medal and cited him for a period of "extraordinary leadership that communicated an understanding of the Defense Mapping Agency's mission and appreciation for its vital role within the Department of Defense."

Vierling, Clinton E. Walker, Jack T. Wallace, Vonnae V. Weir, Charles Weiss, Paulette S. Wells, Robert W. Willett, Stanley F. Winkler, Warren J. Wolfrom.

Suggestion Award

Todd R. Anderson — \$294, Alfred E. Leuschner — \$185, Oliver F. Deppong — \$74, Claire Andracek — \$25.

Ain't We Got Fun?

Halloween 1986 provides the occasion for some costumed frivolity in the Directorate of Civilian Personnel. The old Celtic "Eve of the Dead," the night evil spirits were said to return, is now America's unofficial Fun Day. Don't expect to find any evil spirits at DMAAC, but you might run into a free spirit or two!
